technology as a solution

ENTERPRISE AI PLATFORM

Technijian Chat.AI

Secure, multi-model AI with collective intelligence, workflow automation, and enterprise governance. Deploy the power of GPT-4o, Claude, and Gemini under one roof — with the cost controls, compliance, and data isolation your organization demands.

The Challenge with Enterprise AI Today

Organizations face real barriers adopting AI at scale. Chat.AI was built to solve each one.

Single-Vendor Lock-In

Tying your organization to one AI provider means you inherit their outages, pricing changes, and model limitations.

→ Chat.AI orchestrates OpenAI, Anthropic, Google, and Azure simultaneously with automatic failover.

No Cost Visibility

ChatGPT Team and Copilot charge flat per-seat fees with no transparency into actual token consumption or model costs.

→ Per-call cost attribution, prepaid budgets, and overage alerts give you complete financial control.

Hallucinations & Unreliable Output

Single-model responses have no checks or balances. Users can't tell when the AI is confidently wrong.

→ AI Council deliberation across 3+ models reduces hallucinations by over 30% with consensus validation.

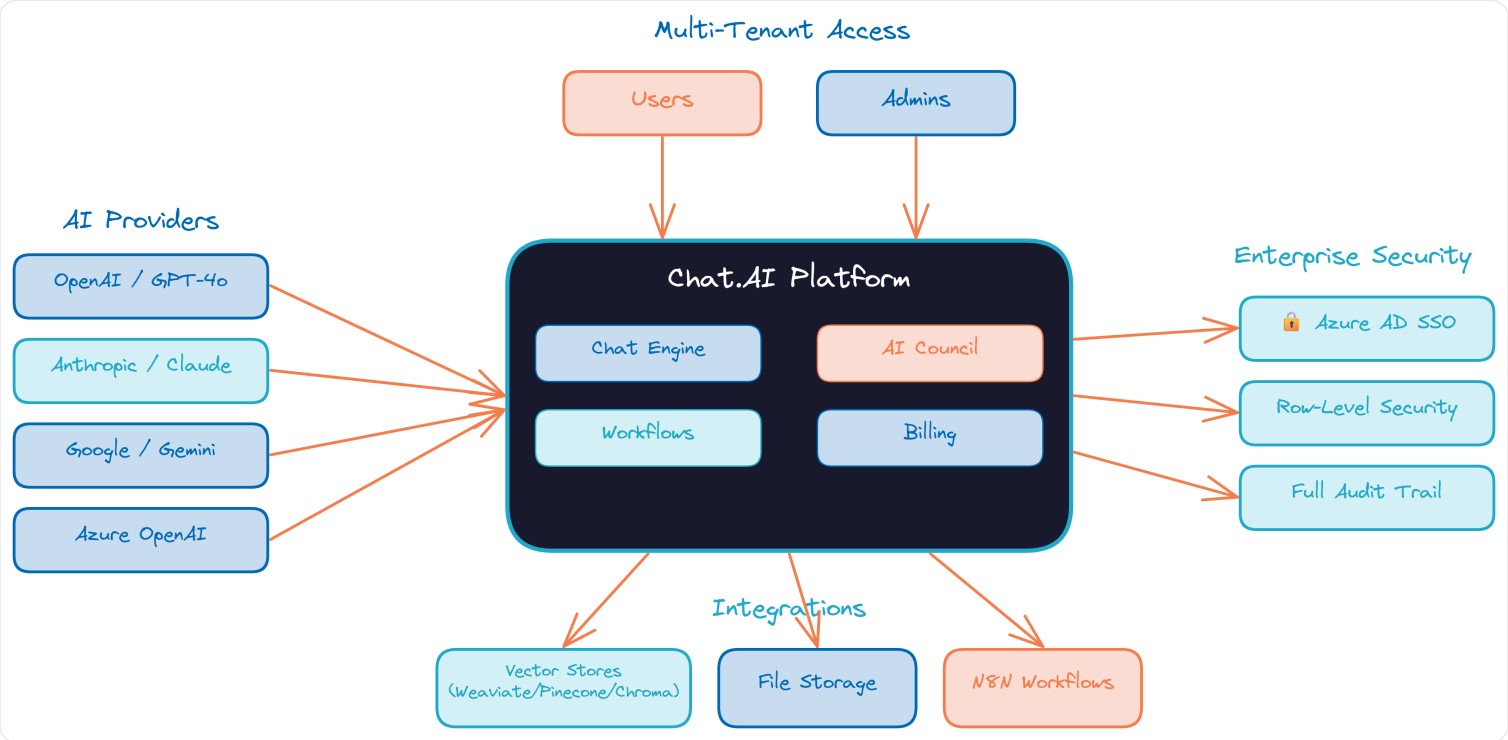
Security & Compliance Gaps

Consumer AI tools lack tenant isolation, audit trails, and the controls required for regulated industries.

→ Row-level security, stored-procedure-only data access, full audit logging, and HIPAA/SOC 2 architecture.

Platform Capabilities

Everything your organization needs to adopt AI securely and effectively.



Multi-Model Chat

Conversational AI powered by GPT-4o, Claude Sonnet, Gemini Pro, and more. Switch models mid-conversation or let the platform route automatically.

- ✓ Streaming responses (SSE)
- ✓ File attachments & analysis
- ✓ Thread sharing with permissions
- ✓ Export & history

Custom AI Assistants

Create purpose-built AI assistants with custom system instructions, connected data sources, and attached connectors.

- ✓ Per-assistant model selection
- ✓ Connector integrations (REST, GraphQL, DB)
- ✓ Shared or private assistants
- ✓ MyGPTs for personal productivity

Projects & Workspaces

Organize chats, files, and instructions into project containers with inherited context and granular sharing.

- ✓ Project-level system prompts
- ✓ Shared files & knowledge
- ✓ View/edit permissions
- ✓ Cross-chat context inheritance

Workflow Automation

Trigger N8N workflows directly from chat. Extract parameters from conversation context and execute multi-step business processes.

- ✓ Chat-initiated workflow triggers
- ✓ Parameter extraction from context
- ✓ Run tracking & cost attribution
- ✓ Per-tenant workflow instances

Knowledge & Memory

Upload documents, vectorize content, and give your AI assistants persistent organizational memory with RAG capabilities.

- ✓ Weaviate, Pinecone, or Chroma
- ✓ File vectorization & embedding
- ✓ Semantic similarity search
- ✓ Per-tenant vector stores

Billing & Cost Controls

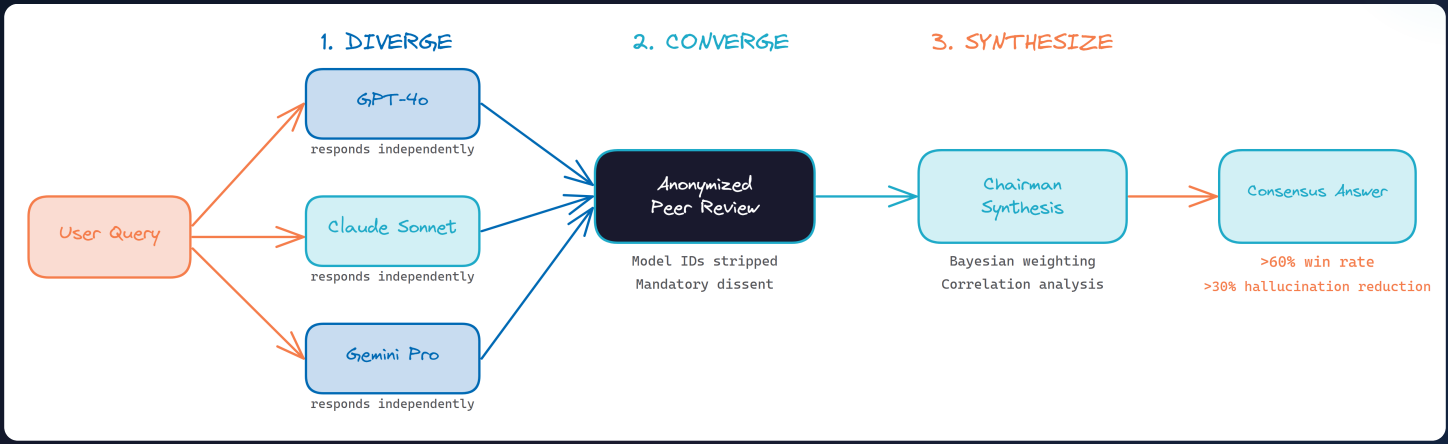
Prepaid balance model with token-level metering, per-model cost breakdowns, and automatic budget alerts before overages hit.

- ✓ Per-call cost attribution
- ✓ Budget alerts at 75% & 100%
- ✓ Per-user & per-model tracking
- ✓ Invoice generation

PATENT PENDING

AI Council — Collective Intelligence

3+ diverse models deliberate through a structured pipeline — more accurate answers, dramatically fewer hallucinations.



1 Divergence
3+ models respond in parallel, independently

2 Convergence
Anonymized peer review with mandatory dissent

3 Synthesis
Chairman model builds Bayesian consensus

SAVE $1,080/yr	SAVE $19,212/yr	SAVE $174,012/yr

technijian.com/chat-ai | All tiers include RAG, workflows & compliance

SMALL TEAM

10-Person Office

ChatGPT Team (10 seats)	$250/mo
+ Zapier for automation	$69/mo
+ Pinecone for RAG	$70/mo
Current total	$389/mo
Chat.AI Starter	$299/mo
Annual savings	**$1,080**

MID-MARKET

50-Person Company

Copilot Pro (50 seats)	$1,500/mo
+ Power Automate Premium	$750/mo
+ Azure AI Search	$250/mo
Current total	$2,500/mo
Chat.AI Growth	$899/mo
Annual savings	**$19,212**

ENTERPRISE

250-Person Organization

ChatGPT Enterprise (est.)	$15,000/mo
+ Custom RAG pipeline	$2,000/mo
+ Compliance tooling	$1,500/mo
Current total	$18,500/mo
Chat.AI Enterprise S	$3,999/mo
Annual savings	**$174,012**

Enterprise-Grade Security & Compliance

Built for regulated industries from the ground up, not bolted on after the fact.

Azure AD SSO
OAuth 2.0 / OIDC with JWT bearer tokens

Row-Level Security
Database-enforced tenant isolation on every query

Full Audit Trail
Every mutation logged with user & timestamp

Azure Key Vault
All secrets encrypted at rest with rotation

Prompt Injection Defense
Salted sequence tags & delimiter separation

HIPAA / SOC 2 Ready
Architecture designed for compliance frameworks

RBAC Roles
Platform Admin, Client Admin, User hierarchies

Rate Limiting
Per-user, per-tenant, per-endpoint throttling

Flexible Deployment

Your AI, your way. Cloud or on-premise — same platform, same capabilities.

☁ Cloud (SaaS)

Fully managed on Azure with automatic updates, monitoring, and 24/7 global support from our U.S. and India offices. Zero infrastructure overhead for your team.

Starting at $299/mo • No setup fees

🏠 On-Premise (Term License)

Deploy inside your own infrastructure for maximum data sovereignty. Ideal for regulated industries, air-gapped environments, and strict data residency requirements.

Starting at $45,000/yr (50 users) • Includes support

About Technijian

Technology as a solution since 2000.

Founded in 2000 by Ravi Jain, Technijian has grown from a single-consultant operation into a full-spectrum IT services company with offices in Irvine, California and India. For over 25 years, we've served small and mid-sized businesses with managed IT, cybersecurity, cloud infrastructure, compliance, and AI-driven solutions.

Our **Technijians Pod Model** assigns a dedicated team to each client — so you get people who truly know your infrastructure, not a rotating cast of strangers. With 24/7 global support at no extra cost, we deliver enterprise-grade technology with the responsiveness of a dedicated partner.
