NEXUS PLATFORM — SECURITY & COMPLIANCE

Nexus Assess + Pulse

Unified IT risk assessment, compliance reporting, and AI-enhanced penetration testing — from discovery to exploitation proof, in one platform.

100+	20+	AI	24/7	CVSS
REPORT TYPES	SECURITY TOOLS	ML CLASSIFIER	MONITORING	RISK SCORING

THE CHALLENGE

Security is fragmented. Risk is invisible.

Organizations juggle disconnected tools for vulnerability scanning, penetration testing, compliance reporting, and risk management. The result: blind spots, tool sprawl, and security theater instead of real protection.

Fragmented Visibility

Separate tools for network scans, cloud audits, and vulnerability assessments create data silos. No single pane of glass for your complete security posture.

→ Nexus Assess unifies network, cloud, and endpoint scanning

False Positive Overload

Vulnerability scanners generate thousands of findings. Without AI-powered triage, security teams waste hours chasing noise instead of real threats.

→ Pulse ML Classifier achieves 95% signal accuracy

Compliance Complexity

HIPAA, SOC 2, PCI-DSS, CJIS, NIST CSF — each framework demands specific evidence. Manual audit preparation consumes weeks of staff time.

→ 100+ auto-generated compliance reports with gap analysis

No Proof of Impact

Traditional vulnerability reports list findings but can't demonstrate real-world exploitability. Executives need proof before approving remediation budgets.

→ Pulse safe exploitation generates evidence for stakeholder buy-in

THE SOLUTION

Two engines. One platform.

Nexus Assess discovers and scores risk across your entire infrastructure. Nexus Pulse validates vulnerabilities with AI-enhanced penetration testing. Together, they close the loop from discovery to proof.

Nexus Assess

IT Risk & Compliance Platform

- ✓ Non-intrusive scans: Windows, macOS, Linux
- ✓ Microsoft 365 & Azure AD security audits
- ✓ AWS infrastructure & cloud permissions
- ✓ CVSS + proprietary + MS Secure Score
- ✓ Dark web monitoring & credential exposure
- ✓ 100+ branded reports with compliance mapping
- ✓ PSA & documentation system integration

Nexus Pulse

AI-Enhanced Penetration Testing

- ✓ 20+ security tools in one platform
- ✓ Subdomain discovery & Nmap port scanning
- ✓ OWASP Top 10 & CMS vulnerability detection
- ✓ ML Classifier for intelligent triage
- ✓ Pentest Robots: automated attack sequences
- ✓ SQLMap & Sniper safe exploitation with PoC
- ✓ Multi-format exports: PDF, HTML, CSV, XLSX

ASSESS + PULSE

Discover & Prioritize

Scan your entire attack surface — network, cloud, endpoints — and rank risks with dual CVSS + proprietary scoring and dark web intelligence.

PULSE

Validate & Prove

Go beyond finding vulnerabilities. Run safe exploitation campaigns with Pentest Robots to generate stakeholder-ready evidence of real-world risk.

ASSESS

Report & Comply

Auto-generate 100+ branded reports covering HIPAA, SOC 2, PCI-DSS, CJIS, NIST CSF, and CIS Controls with remediation guidance.

CONTINUOUS

Monitor & Retest

Schedule recurring scans and auto-testing campaigns. Detect drift, verify remediation, and maintain continuous compliance posture.

ASSESS — FEATURE DEEP-DIVE

Comprehensive risk intelligence at scale

From endpoint discovery to executive compliance reports, Assess gives you complete visibility into your IT security posture.

Discovery & Scanning

Non-intrusive, cross-platform asset discovery with lightweight agents and remote data collectors.

- ✓ Windows, macOS, and Linux endpoint scanning
- ✓ Remote data collectors for distributed networks
- ✓ SQL Server database security assessments
- ✓ Automated scheduling with continuous monitoring

Cloud & Microsoft 365

Deep cloud security auditing for the entire Microsoft ecosystem and AWS infrastructure.

- ✓ M365, Teams, SharePoint, OneDrive, Exchange audits
- ✓ Azure AD & Active Directory security analysis
- ✓ AWS infrastructure evaluation & configuration review
- ✓ Cloud permission analysis & misconfiguration detection

Risk Intelligence

Multi-source risk scoring that combines industry standards with proprietary algorithms.

- ✓ Dual scoring: proprietary + CVSS + Microsoft Secure Score
- ✓ Severity-based prioritization with remediation guidance
- ✓ Dark web monitoring & credential exposure detection
- ✓ Vulnerability scanning with CVE correlation

Reporting & Compliance

100+ branded report types from executive infographics to deep technical assessment details.

- ✓ Executive infographics, risk plans, and technical reports
- ✓ IT change comparison & end-user activity tracking
- ✓ HIPAA, SOC 2, CJIS, PCI-DSS, HPH CPGs compliance
- ✓ White-labeled client-facing reports with your branding

PULSE — FEATURE DEEP-DIVE

AI-enhanced penetration testing

20+ security tools unified on one platform with ML-powered triage and automated attack sequences.

Reconnaissance & Discovery

Map the complete attack surface with automated reconnaissance and fingerprinting.

- ✓ Subdomain finder with deep DNS enumeration
- ✓ TCP/UDP port scanning powered by Nmap engine
- ✓ URL fuzzer for hidden paths and endpoints
- ✓ Technology fingerprinting & service identification
- ✓ SSL/TLS certificate analysis and configuration audit

Vulnerability Scanning

Comprehensive application and network vulnerability detection with AI-enhanced capabilities.

- ✓ Website scanner with AI-enhanced auth handling
- ✓ SQL injection, XSS, SSRF, OWASP Top 10 detection
- ✓ CMS scanning: WordPress (WPScan), Drupal, Joomla
- ✓ Network vulnerability scanning via OpenVAS engine

AI & Automation

Machine learning eliminates noise and orchestrates intelligent attack workflows.

- ✓ ML Classifier: auto-categorize HIT / MISS / PARTIAL
- ✓ Pentest Robots: reusable attack sequences
- ✓ AI fallback for dynamic login page authentication
- ✓ Smart noise filtering eliminates false positives

Exploitation & Proof

Safe, controlled exploitation that generates actionable evidence for stakeholders.

- ✓ SQLMap automated SQL injection exploitation for PoC
- ✓ Sniper auto-exploiter for controlled risk demonstration
- ✓ Evidence capture with screenshots & payload logging
- ✓ Multi-format exports: PDF, HTML, CSV, XLSX

HOW PULSE WORKS

1. **Scope** — Define targets: domains, IPs, CIDR ranges, or cloud assets
2. **Scan** — Run Pentest Robots or individual tools against your surface
3. **Triage** — ML Classifier filters noise and ranks by exploitability
4. **Prove** — Safe exploitation with evidence capture for stakeholder reports

PRICING & PLANS

Flexible plans for every organization

Choose Assess for risk assessment, Pulse for penetration testing, or bundle both for comprehensive security coverage.

Nexus Assess

IT Risk & Compliance Platform

Plan	Monthly	Annual	Endpoints
Essentials	$499	$4,990	Up to 50
Professional	**$999**	**$9,990**	**Up to 250**
Enterprise	$1,999	$19,990	Unlimited
Managed	Custom pricing		Full service

Includes compliance module • Professional adds dark web monitoring

Nexus Pulse

AI-Enhanced Penetration Testing

Plan	Monthly	Annual	Scans/mo
Starter	$299	$2,990	25
Professional	**$799**	**$7,990**	**100**
Enterprise	$1,499	$14,990	Unlimited
Managed Pentest	Custom pricing		Full service

All plans include ML Classifier • Professional adds Pentest Robots

Annual plans save 17% • Bundle Assess + Pulse for additional discounts

Competitive Comparison

ASSESS VS. COMPETITORS

Capability	Qualys	Nessus	Nexus Assess
Agentless scans	✓	✓	✓
M365 audits	—	—	✓
100+ reports	—	—	✓
Dark web monitor	—	—	✓
Compliance GRC	Add-on	—	✓ Built-in
PSA integration	—	—	✓ Full

PULSE VS. COMPETITORS

Capability	Burp Suite	Acunetix	Nexus Pulse
Cloud-native	—	✓	✓
AI/ML classifier	—	—	✓
Pentest Robots	—	—	✓
Network + web	Web only	Web only	✓ Both
Auto exploit PoC	Manual	—	✓
Multi-scan export	—	Limited	✓ Full

ROI & EFFICIENCY

Measurable impact from day one

Consolidate tools, eliminate false positives, and accelerate compliance — with quantifiable savings across your security operations.

90%
FASTER PENTESTING
Manual testing: 40 hrs → Automated: 4 hrs per engagement

95%
SIGNAL ACCURACY
ML Classifier eliminates false positives, focus on real threats

$15K
ANNUAL SAVINGS
Consolidate 5+ separate tools into one unified platform

85%
FASTER AUDITS
Manual audit → Automated: continuous scanning & reporting

$4.45M
BREACH COST AVOIDED
Average cost of a data breach (IBM 2025 report)

70%
COMPLIANCE PREP REDUCTION
Auto-generated compliance reports replace weeks of manual work

SECURITY & COMPLIANCE FRAMEWORKS

- **HIPAA** — Healthcare privacy
- **SOC 2** — Trust services criteria
- **PCI-DSS** — Payment card security
- **CJIS** — Criminal justice info
- **NIST CSF** — Cybersecurity framework
- **CIS Controls** — Critical security controls
- **GDPR** — EU data protection
- **HPH CPGs** — Health sector goals

USE CASES

Proven results across every industry

From healthcare compliance to MSP service delivery, Nexus Assess + Pulse adapts to your security needs.

HEALTHCARE CISO

HIPAA Compliance & Risk Assessment

Challenge: Manual compliance audits taking 3 weeks per quarter with incomplete coverage across 500 endpoints.

Solution: Automated Assess scans + Pulse validation reduced audit prep from weeks to hours with 100% endpoint coverage.

70% Audit prep reduction

MSP SECURITY LEAD

Multi-Tenant Vulnerability Management

Challenge: Managing security for 25 client tenants with 5 different scanning tools and no unified reporting.

Solution: Consolidated to Assess + Pulse with branded per-tenant reports and automated Pentest Robot campaigns.

$15K Annual tool savings

ENTERPRISE SECURITY DIRECTOR

Executive Risk Communication

Challenge: Board presentations required proof of exploitability, not just scan results. Manual pentesting took 40+ hours.

Solution: Pulse automated exploitation with evidence capture + AI-generated executive advisories in hours, not weeks.

90% Faster pen testing

REPORT COVERAGE

Over 100 report types spanning network, security, cloud, compliance, and AI-generated vulnerability intelligence.

32	39	13	10
Network Assessment	Security Assessment	Microsoft Cloud	Compliance Framework
Infrastructure & topology	Vulnerabilities & risks	M365 & Azure AD	HIPAA, SOC 2, PCI-DSS

7	**∞**	**5**	**24/7**
Pulse AI Reports	Custom Reports	Export Formats	Continuous Monitoring
AI-generated advisories	Branded & white-labeled	PDF, HTML, CSV, XLSX, JSON	Scheduled & on-demand

Ready to see your complete security posture?

About Technijian

Technijian is a leading managed IT services provider headquartered in Irvine, California, with over 25 years of experience delivering enterprise-grade technology solutions. Our pod-based service model combines dedicated engineers, proactive monitoring, and cutting-edge platforms like Nexus to deliver measurable security outcomes for organizations of all sizes. We serve clients across healthcare, finance, legal, manufacturing, and government sectors with offices in the USA and India.
