The AI Challenge

Most organizations know AI can transform their operations — but struggle with where to start, how to prioritize, and who can actually implement solutions that work in real business environments.

Strategy Without Execution

Most consultants deliver a slide deck and walk away. You need someone who architects, builds, and deploys solutions through to production.

→ Technijian delivers strategy AND implementation

AI Hype vs. Real ROI

Cutting through vendor noise to identify AI use cases that deliver measurable business value — not just impressive demos.

→ ROI-first use case prioritization

Security & Compliance Gaps

AI solutions that ignore HIPAA, SOC 2, PCI-DSS, or GDPR create more risk than value. Governance must be built in from day one.

→ Compliance built into every solution

Adoption & Change Management

Technology alone doesn't transform. Your team needs workflows, training, guardrails, and governance to actually use AI effectively.

→ Full operationalization with training

Why AI Consulting Now?

- AI capabilities have matured from experimental to production-ready — the window to build competitive advantage is open now
- Organizations that deploy AI operationally today will compound efficiency gains that late adopters cannot catch up to
- Regulatory frameworks are codifying AI governance requirements — proactive compliance is cheaper than reactive
- The cost of not automating is rising: competitors are already using AI to reduce manual effort by 50-70%

AI Consulting Services

Comprehensive AI consulting from strategy through operational deployment — not just advice, but hands-on delivery.

AI Strategy & Roadmaps

- ✓ AI readiness assessments & opportunity mapping
- ✓ Executive workshops & leadership briefings
- ✓ Use case prioritization with ROI modeling
- ✓ Adoption roadmaps with phased rollout plans
- ✓ Governance, risk & operating model design
- ✓ Vendor evaluation & technology selection

Hands-On Implementation

- ✓ LLM workflow design with guardrails & approvals
- ✓ Multi-agent orchestration (Claude, GPT-4o, Gemini)
- ✓ RAG/vector knowledge systems (Weaviate, Chroma)
- ✓ API-first architecture & MCP server integration
- ✓ Production deployment & operational handoff
- ✓ Custom AI product design & feature development

AI-Powered Solutions

- ✓ Document intelligence & automated abstraction
- ✓ Predictive analytics & customer intelligence
- ✓ Workflow automation & process orchestration
- ✓ AI-assisted compliance & audit workflows
- ✓ Knowledge systems with persistent AI memory
- ✓ Content automation & multi-channel distribution

Security & Governance

- ✓ Security-first AI design with RBAC & audit trails
- ✓ HIPAA, SOC 2, PCI-DSS, GDPR compliance built-in
- ✓ Data governance & least-privilege access controls
- ✓ Secure tool integration & policy-aware AI tooling
- ✓ Evidence collection & compliance automation
- ✓ AI governance frameworks & risk management

How We Engage

1. **Discover** — Map workflows, pain points & AI opportunities
2. **Design** — Architect solutions for goals & compliance
3. **Implement** — Build, test & deploy with hands-on engineering
4. **Operate** — Operationalize with training & governance

Proven Results

Real projects, real outcomes — delivered by Technijian for enterprise clients across multiple industries.

ENTERPRISE AI

Multi-Agent SEO Automation Platform

Architected a multi-agent platform integrating Claude, GPT-4o, and Gemini with MCP servers for SEMrush, GA4, Perplexity, Firecrawl, DataForSEO, and social distribution.

~70% Faster production

6+ MCP integrations

FINANCIAL SERVICES

AI Document Intelligence for FINRA Broker-Dealers

Deployed AI-driven document intelligence to auto-populate complex vendor questionnaires and compliance documents for FINRA-registered broker-dealers.

Days→Min RFP turnaround

60-80% Less review

PRODUCT DEVELOPMENT

ScamShield AI Scam Detection Product

Architected using LLM Council (Claude + GPT-4o + Gemini), Weaviate RAG vector memory, IPQS/Twilio risk scoring, and Whisper voice transcription.

70-80% Gross margins

RAG Persistent memory

ENTERPRISE AI

Enterprise Knowledge & Memory Systems

Implemented Weaviate and Obsidian.md hybrid memory systems for enterprise AI agents, enabling persistent, curated knowledge retrieval across sessions.

Persistent Cross-session

METHODOLOGY

AI-Native Software Development (SDLC v7.0)

Designed an AI-first SDLC integrating Claude Code with Figma Make, GitHub, and CI/CD pipelines — discovery through post-release monitoring.

End-to-End Full lifecycle

Engagement Models

Flexible arrangements designed to meet you where you are in your AI journey.

Fixed-Scope Projects

Defined scope, deliverables, timeline, and outcomes. Pay for results, not hours.

- ✓ AI Readiness Assessments
- ✓ Document Intelligence Solutions
- ✓ Tenant/Customer Analytics Platforms
- ✓ Workflow Automation Deployments

Best for: Discrete initiatives with clear objectives

Flexible Consulting

On-demand strategic and implementation support as your needs evolve.

- ✓ Architecture reviews & design sessions
- ✓ Implementation support & troubleshooting
- ✓ Vendor evaluation & technology selection
- ✓ AI governance framework development

Best for: Ongoing guidance alongside internal teams

Fractional AI Advisor

Retained monthly engagement providing AI leadership on a predictable cadence.

- ✓ Strategic AI guidance & roadmap management
- ✓ Team enablement & skill development
- ✓ Vendor management & technology oversight
- ✓ Implementation quality assurance

Best for: Building long-term AI capability

Executive AI Workshops

Half-day or full-day briefings tailored to your industry and portfolio.

- ✓ AI landscape & competitive positioning
- ✓ Live demos with your actual data scenarios
- ✓ Opportunity assessment & prioritization
- ✓ Actionable next-steps roadmap

Best for: Leadership alignment before committing to AI

Industries We Serve

- Real Estate & Property Mgmt
- Financial Services & FINRA
- Healthcare & HIPAA
- Legal & Professional Svc
- Technology & SaaS
- Manufacturing & Distribution
- Non-Profit & Education
- Retail & eCommerce

My AI Consulting Framework

Enterprise AI strategy & implementation — from discovery to operational deployment

Technijian My AI Consulting: Engineering the Future of Enterprise Intelligence

Comprehensive AI consulting framework for operational efficiency and high-margin results.

Core Service Pillars

Strategy & Readmap
Defining AI vision & aligning technological capabilities with business objectives.

Enterprise Implementation
Deploying scalable AI infrastructure & integrating seamlessly into existing workflows.

Custom AI Solutions
Developing bespoke AI tools & applications tollared to srouse organizational challenges.

AI Security & Governance
Ensuring data privacy, ethical compliance, & robost security preıxeots for AI deployments.

The 4-Step Delivery Process

1. Discover
Assessing current state, identifying high-impact AI use cases, & evaluating data readiness.

2. Design
Architecting the AI solution, selecting tech loack, & deliiring implementation roadmap.

3. Implement
Executing the build phase, integrating data soureeo, & fine-runing models for production.

4. Operate
Continuous monitoring, performance optimization, & scaling solution across the enterprise.

Impact and Results

70%
Faster Execution
Significant reduction in time-to-market for AI-driven projects compared to traditional development cycles.

DAYS → MINUTES
Days to Minutes
Drastic operational acceleration, transforming multi-day manual processes into automated minute-long tasks.

70-80%
Operating Margins
Realizing high-efficiency gains that directly translate to superior business margins and ROI.

Engagement & Technology

Flexible Engagement Models
Tailored partnership structures ranging from project-based consulting to dedicated managed AI services.

Leading Technology Stack
Utilizing industry-standard frameworks and cloud providers to build resilient, future-proof AI ecosystems.
