- ✓ CMS scanning: WordPress (WPScan), Drupal, Joomla

AI Automation & Exploitation

- ✓ ML Classifier: auto-categorize HIT / MISS / PARTIAL / INCONCLUSIVE
- ✓ Pentest Robots: reusable attack sequences mimicking adversaries
- ✓ SQLMap auto-exploitation & Sniper auto-exploiter for PoC
- ✓ Screenshot & payload logging for stakeholder evidence

HOW IT WORKS

ASSESS

1. **Deploy** — Agents or agentless scans
2. **Assess** — Auto security evaluation
3. **Report** — Executive & technical reports

PULSE

1. **Scope** — Define targets & surfaces
2. **Scan** — Run Pentest Robots
3. **Prove** — Safe PoC with evidence

WHY NEXUS ASSESS + PULSE

- **Complete visibility:** Network, cloud, endpoints, and Active Directory from a single unified platform
- **AI-powered accuracy:** ML classifier eliminates false positives — focus on real vulnerabilities
- **Proof, not just findings:** Safe exploitation tools generate evidence for executive buy-in
- **100+ branded reports:** Executive infographics, risk plans, technical details, and compliance mapping
- **Assess + pentest unified:** Risk assessment and penetration testing in one platform, one pane of glass
