2025**+76%**More travelers now seeking an  
advisor**59%**Of advisors now use AI (was  
41%)**2023**

Founded — visibility to build

Pangea Luxe Travel is a boutique luxury travel advisory — a husband-and-wife team, Ryan & Katie McKibben — based in South Orange County and operating as an independent affiliate of the Cadence Travel host agency. Through Cadence, Pangea has genuine luxury credibility: access to the Virtuoso network, a Forbes Travel-endorsed network, and elite hotel status. This summary shows where AI builds on that foundation — on two fronts — and states only verified facts, deferring every company-specific number to a short discovery call.

**Win more travelers.** Affluent travelers find advisors through referrals, Instagram, search, and increasingly AI assistants. Today your authority is real but your independent visibility is thin — one blog post, a modest social footprint. Authority content, AI-search and local optimization, a visual content rhythm, and review velocity make you the advisor more of the right travelers find. **Serve them in a fraction of the time.** AI drafts the itinerary, does the supplier research, assembles the quote, and produces the branded trip documents — so two people serve more travelers without hiring. Every itinerary and booking is still confirmed by a human, and client data stays in private, governed tools.

## What we verified

- **A credentialed boutique:** a husband-and-wife luxury advisory (founded 2023), independent affiliate of Cadence Travel, with Virtuoso advisor profiles and luxury-hotel status — credibility conferred through your host agency.
- **A relationship-led business:** you grow through referrals and repeat clients first; this plan protects that core and adds a discovery channel around it — not "shotgun" marketing.
- **Borrowed authority, thin own visibility:** a dormant blog (one post), a quiet social presence, and little content for search or AI to cite — the clearest, lowest-cost place to start.
- **Time is the constraint:** a two-person advisory can only carry so many active trips, because each one is hours of research, itineraries, quotes, and documents — exactly the work AI does well.

### The one idea

Your authority is borrowed from Virtuoso and Cadence — but your visibility and your time are yours to build. AI makes you the advisor affluent travelers find, and gives two people the back-office reach of a ten-person agency. That lets Pangea grow without burning out and without hiring before you are ready.

## The engine

Three parts: get found and chosen by the right travelers, plan and serve them faster, then keep and grow them through repeat and referral — each delivered by a specific Technijian service.

### Pangea Luxe AI Growth & Time Engine

Win more travelers (left); plan and serve them faster (centre); keep and grow them (right) — so two people run like a much larger agency.

\* My SEO / My AI / My Dev. The advisor personalises and confirms every itinerary, quote and booking; client and payment data stays in private, governed tools.

## The program — a small, easy first step

We price from real, published service ranges and keep the entry deliberately small — sized for a growing two-person advisory. The entry pays for itself on the two highest-value levers alone — hours recovered and a few additional trips won. The larger custom build comes later, only once the entry proves the lift.

| Entry program (Year 1)                            | Tier / description                  | Investment |
|---------------------------------------------------|-------------------------------------|------------|
| <b>My SEO — Growth Starter</b>                    | Local + AI-search, reviews, content | ~\$850/mo  |
| <b>My AI — Visibility &amp; Content Jumpstart</b> | One-time workshop + setup           | ~\$2,500   |
| <b>ENTRY PROGRAM — the easy yes</b>               | Year-1 total                        | ≈ \$12,700 |

*Modeled against the entry, the likely first-year return is roughly 3× — built on hours recovered and a handful of extra trips, with the real figures calibrated to your numbers at discovery. Productized My SEO rates are real and published; My AI is an estimate confirmed at quote. We do not invent prices.*

## The first 90 days, and the next step

A fixed-scope 90-Day Visibility & Time Pilot stands up your get-found foundation and one working AI time-saver — with no long lock-in. If it is not creating visible lift and saving you real hours by day 90, we will tell you honestly whether to continue.

### Start the conversation

A short discovery call is the easiest first step — no obligation, and we are local in Irvine. The full blueprint goes deeper and ends with a short questionnaire that turns this summary into a costed, calibrated plan.
