

Evidence Binders on Demand. Tamper-evident audit logging, linked evidence, and one-click audit pack export aligned to your frameworks.

AUDIT CAPABILITIES

Centralized Audit Logging

Append-only audit events with correlation IDs across systems, privileged-action logging, and full user · action · object · timestamp capture for every compliance-relevant operation.

Evidence Repository

Linked evidence per control: policy attestations, test results, screenshots, ticket records, and approval signatures — all versioned and ready for assessor review.

Audit Pack Builder

Pick a framework + time window; the builder auto-collects linked evidence, generates an indexed manifest, and exports an auditor-ready PDF or ZIP package.

Retention & Archive

Configurable retention per framework (HIPAA 6-yr, SOC 2, PCI, etc.), tamper-evident WORM storage, and immutable export support for legal hold.

TODAY → NEXUS

TODAY — TECHNIJIAN DELIVERY

Technijian consulting — evidence binders are assembled manually from tool exports, spreadsheets, and emailed attachments. Time-intensive but tailored to each assessor and framework.

FUTURE — NEXUS PLATFORM

Nexus Audit module — auto-generated audit packs with framework-aligned evidence, real-time gap detection, and one-click auditor package generation.

WHY AUDIT

- **Evidence Is the Audit:** Every framework's audit hinges on evidence. Without systematic collection, you scramble the week before.
- **Linked, Not Loose:** Evidence is attached to controls — assessors see traceability, not a folder of PDFs.
- **Audit Season → Non-Event:** Pre-built packs mean auditors get what they need on day one, not week three.
- **Tamper-Evident Trail:** Append-only logs and immutable exports prove integrity to assessors and regulators.
- **Multi-Framework Reuse:** One evidence repository serves HIPAA, SOC 2, PCI, ISO, CMMC, GDPR, NIST, and HITRUST.

ENGAGEMENT MODELS

Model	Scope
Audit Readiness Prep	Fixed-fee, framework-specific gap close + evidence collection prior to certification audit
Managed Evidence Collection	Ongoing monthly capture, organization, and refresh of evidence linked to each control
Audit Sherpa	Hands-on guidance through certification — assessor liaison, evidence presentation, finding response
Evidence Binder Remediation	Cleanup of legacy binders, control mapping, and gap closure to make existing evidence audit-ready

COMPLIANCE FRAMEWORKS SERVED

- ✓ HIPAA ✓ SOC 2 ✓ PCI-DSS ✓ CMMC ✓ ISO 27001 ✓ GDPR
- ✓ NIST 800-171 ✓ HITRUST ✓ CCPA
