The IT Challenge

Most SMBs don't have an IT problem — they have an IT operating-model problem. Break-fix, vendor chaos, and surprise costs quietly drain productivity and inflate risk until something breaks.

Break-Fix Reactive IT

Every outage turns into a fire drill. No visibility into what's about to break, no baseline for system health, and downtime costs quietly add up each quarter.

→ Proactive monitoring prevents outages

Vendor Chaos

Too many IT vendors, overlapping tools, and finger-pointing when something goes wrong. No single throat to choke, no unified accountability.

→ One partner, one accountable team

Unpredictable IT Costs

Capital expenses catch you off guard. There's no way to forecast IT spend, and every incident seems to come with a surprise invoice attached.

→ Predictable monthly OpEx replaces CapEx shocks

Compliance & Security Gaps

HIPAA, PCI, and SOC 2 requirements are unclear. You don't know if you're actually covered until an auditor or an incident shows up at the door.

→ Built-in compliance support from day one

Why My IT Now?

- ▶ Proactive monitoring and patching prevent outages before users feel them — reactive break-fix is no longer competitive
- ▶ Vendor consolidation into one managed IT partner saves money and eliminates the finger-pointing between overlapping providers
- ▶ Predictable monthly OpEx replaces surprise CapEx — you can finally budget IT like any other operating expense
- ▶ Built-in compliance support (HIPAA, PCI, SOC 2) means you're audit-ready, not audit-stressed

Managed IT Services

Full-stack managed IT delivered by U.S.-based technicians — from 24/7 help desk through strategic vCIO leadership. One partner, one accountable team.

24/7 Monitoring & Help Desk

- ✓ Round-the-clock NOC coverage & security monitoring
- ✓ Proactive alerting & incident triage
- ✓ Remote & on-site response anywhere in SoCal
- ✓ U.S.-based technicians, no offshore handoffs
- ✓ ITIL-aligned ticketing & SLA reporting
- ✓ After-hours & weekend escalation on call

Desktop & Server Support

- ✓ Endpoint management & asset inventory
- ✓ Automated patch management & updates
- ✓ Hardware lifecycle & procurement
- ✓ Backup verification & test restores
- ✓ Performance tuning & optimization
- ✓ Microsoft 365 & productivity suite admin

Network Management

- ✓ Network design, segmentation & refresh
- ✓ Firewall deployment & policy management
- ✓ VPN, SD-WAN & secure remote access
- ✓ Wi-Fi design, survey & optimization
- ✓ Switch, router & cabling lifecycle
- ✓ Multi-site connectivity & failover

Strategic IT Leadership

- ✓ vCIO services & executive IT reporting
- ✓ Technology roadmapping & planning
- ✓ IT budget modeling & forecasting
- ✓ Vendor management & contract review
- ✓ Risk, security & compliance posture reviews
- ✓ Quarterly business reviews with leadership

How We Engage

1

Assess

Discovery & IT maturity scoring

2

Stabilize

Fix quick wins, reduce ticket volume

3

Optimize

Standardize, automate & harden

4

Manage

24/7 ongoing managed IT

Reference Implementations

Representative managed IT engagement profiles drawn from our Orange County SMB practice — the scale, shape, and outcomes you can expect when we take over your IT operations.

MULTI-LOCATION SMB

100-User SMB with 3 Offices — Unified Managed IT

Unified help desk, consolidated network monitoring, and standardized endpoint imaging across three Orange County offices — one ticketing queue, one patch standard, one accountable team.

3 Sites

Unified

Workforce

Engagement Models

Flexible ways to partner with Technijian — from one-time projects to fully outsourced managed IT, or co-managed alongside your internal IT team.

Fixed-Scope Project

Defined scope, deliverables, timeline, and outcomes — pay for a result, not for hours.

- ✓ Network refresh & firewall deployment
- ✓ Microsoft 365 migration & tenant hardening
- ✓ Office relocation & new-site build-out
- ✓ Backup & disaster-recovery implementation

Best for: Discrete initiatives with clear objectives

Flexible Consulting

On-demand, hourly IT consulting and engineering support when you need an extra hand.

- ✓ Architecture reviews & second opinions
- ✓ Incident response & troubleshooting
- ✓ Vendor evaluation & RFP support
- ✓ Documentation & standards authoring

Best for: Ad-hoc expertise without a retainer

Managed IT

Fully outsourced managed IT on a predictable monthly retainer — we own the outcome.

- ✓ 24/7 help desk & monitoring
- ✓ Endpoint, server & network management
- ✓ Backup, patching & compliance posture
- ✓ vCIO reporting & IT roadmap ownership

Best for: SMBs without dedicated internal IT

Co-Managed IT

We partner with your internal IT team — extending coverage, tools, and senior expertise.

- ✓ After-hours & overflow help desk
- ✓ Shared RMM, ticketing & documentation
- ✓ Senior architects on demand
- ✓ Compliance & security co-ownership

Best for: Companies with lean internal IT teams
