1978Family-owned, 2
generations**3,800+**

Trucks, tractors & trailers

26+

Facilities across 10 states

1,500+

Team members

TCI already runs operational AI — preventative maintenance, collision mitigation, telematics. This blueprint points AI at the one place it has not yet aimed: the commercial side, where the next dollar of growth is found, won, and kept. Two pillars: own the recurring leasing core through search and account intelligence, and own the California EV / WAIRE niche the national giants treat generically. This summary covers the opportunity, the engine, the program, and the entry. The full blueprint is ready on request.

Prepared for TCI Transportation | Technijian | 2026-06-01

01 The Opportunity

TCI wins work through 47 years of relationships, a full-service offer under one roof, and a service culture the national giants can't match in any single market. None of that changes. What this blueprint adds is a commercial-AI layer underneath it, on two pillars at once:

	Pillar 1 — The Recurring Core	Pillar 2 — The EV / WAIRE Wedge
The win	More full-service leases, maintenance contracts, and used-truck sales captured	Own the California zero-emission transition the giants treat generically
How	Local + answer-engine search across 26+ yards; account intelligence on fleets	Target WAIRE-obligated warehouses; EV trucks + charging + a compliance-ROI tool
AI role	Get found, surface named accounts, automate the quote and the RFP	Find obligated warehouses by truck-trip data; make the compliance math a sale

Why Now — The 2026 Window

California is legislating the EV pillar into a deadline: SCAQMD's WAIRE rule ramps warehouse obligations through 2031, and CARB's Advanced Clean Fleets and Advanced Clean Trucks mandates push zero-emission adoption — a buyer who needs exactly what TCI offers, in TCI's own air basin.

The freight market rewards diversification: with carriers failing and the recovery slow, TCI's recurring mix — leasing, maintenance, factoring, used trucks — is a resilience story it does not yet tell where buyers look.

The national giants are digitally strong but generic. The nimble, local, family-owned operator that out-modernizes regionally captures the demand and the EV niche before they localize.

02 The Engine

Three motions, all aimed at the fleets, shippers, and warehouses TCI already knows — never a broad funnel. AI gets TCI found, arms the sales team, and speeds the quoting and bidding; the relationship, the yards, and the lease still close the deal.

TCI AI Growth Engine - Get Found, Win Named Accounts, Run Leaner

Searchable demand on the left; account-based outbound to named fleets, shippers & WAIRE warehouses in the center; capture & service on the right.

GET FOUND searchable demand: SEO + AEO	ACCOUNT INTELLIGENCE named accounts + outbound	INTERNAL AUTOMATION quote, serve, retain
Local + AEO Search 'full-service truck leasing [city]', 'used semi for sale', 'truck parking [city]'. My SEO	Named-Account Prospecting Private fleets, shippers & carriers by territory and fleet size. Lead Gen	Quote / Spec-to-Lease Assistant Configure a lease or used-truck deal and capture the lead 24/7. My Dev
Location / Yard Pages A page per facility and service across 26+ yards in 10 states. My SEO	WAIRE Warehouse Targeting Find 100k+ sq ft warehouses by truck-trip volume - the EV wedge. Lead Gen	WAIRE / EV ROI Tool Compliance-cost-vs-ZE-lease calculator that starts the sales talk. My Dev
GEO - AI Answer Citations Be the cited source in ChatGPT, Perplexity & Google AI Overviews. My SEO	RFP / Lease Proposal Auto-Draft Dedicated-contract & lease bids drafted in hours, not days. My AI	Used-Truck Merchandising Auto-listings, spec sheets, syndication and buyer-match. My Dev
WAIRE / EV Authority + GBP Own the WAIRE & ZE-truck questions; reviews across every yard. My SEO	Account Dossiers + Churn Pre-visit briefs for reps; flag at-risk lease / maintenance accounts. My AI	Portal + AI Chatbot Leasing, maintenance, factoring & roadside self-service. My Dev

* My SEO - My AI Lead Gen - My AI - My Dev. AI gets TCI found and arms the field team - it does not replace the relationship, the yards, or the lease that closes the deal. TCI already runs tl

Get Found · Account Intelligence & Outbound · Internal Automation — extending the operational AI TCI already runs

Get found

Local and answer-engine search across 26+ yards: a page per facility and service, and authority content that owns the WAIRE, EV-truck, leasing, and used-truck questions buyers ask in Google and AI answers.

Win named accounts

The same public-records account-intelligence motion already in production for a Technijian client — 24 contact-ready leads in a single 75-minute run — pointed at WAIRE-obligated warehouses and named fleets. Delivered as My AI Lead Gen (published tiers), with RFP and lease-proposal automation behind it.

Run leaner

A quote / spec-to-lease assistant, a WAIRE/EV ROI tool that turns the regulation into a sales conversation, used-truck merchandising, and an AI-assisted portal across leasing, maintenance, factoring, and roadside.

03 The Program

The program is built land-and-expand on two published engines, then a custom build scoped at discovery. We are deliberate about money — only published prices are stated as firm (My SEO and My AI Lead Gen); the build is priced from the real 2026 US-led rates and scoped into a fixed-price Statement of Work, never an invented number.

Published Recurring Program	Scope	Monthly	Y1
My SEO — Tier 5 + AEO / PR / Syndication	Multi-location local + answer-engine search foundation; 12-mo, unlimited hours	\$2,050	~\$24,600
My AI Lead Gen — Professional	3 vertical pipelines (fleets, shippers, WAIRE warehouses), 2,500 leads/mo (+\$5,000 setup)	\$3,499	~\$46,988
PUBLISHED RECURRING (Y1)	Annual plans save 17% + waive setup (≈ \$59,590)	\$5,549	~\$71,588

Custom Build & Advisory (scoped in discovery)	Basis — 2026 US-led rate	Investment
Custom AI & app build (quote-to-lease, WAIRE/EV ROI tool, portal, used-truck)	US development \$150/hr (\$125/hr contracted)	Fixed-scope SOW
Fractional AI Advisor + Executive Workshop	Estimates: ~\$2,000/mo + ~\$5,000 one-time	Confirmed at discovery

The Return — Value at Stake

Rather than print an ROI multiple we cannot yet stand behind, we name the levers the program moves: new full-service lease and dedicated-contract wins, WAIRE-driven EV deals (a zero-emission Class 6/7 truck earns WAIRE points worth roughly \$68,000 in avoided fees), used-truck unit-sales lift, and retained leasing volume.

Within five business days of a 30-minute discovery call, Technijian returns a calibrated ROI model and a fixed-scope Statement of Work built on TCI's real per-deal economics. Prove the foundation first, then size the engine.

04 The Roadmap & Next Step

90 / 180 / 365 Day Growth Roadmap

TCI - Technijian growth program. Get found, win named accounts, run leaner.

* Account, lease & WAIRE-deal targets calibrate after a 30-min discovery call (see the Questions section). Estimates shown are conservative.

Foundation (0-90 days) → Demand & Intelligence (90-180) → Scale & Automate (180-365)

A local, family-built partner for the commercial side of TCI.

Start with five Quick Wins and one live before/after — no contract, no obligation.

Use the Book a Meeting button in my signature to set up a time to discuss this and the AI strategies Technijian is putting into place for itself and its clients.
