

PET CARE PLUS

AI Growth & Integration Strategy — Executive Summary

Prepared by Technijian | 2026-06-02 | West Loop, Chicago | petcp.com

1998

Same-Owner Since

5

Services, One Resort

4.7

Google Star Rating

24/7

Staffed, 365 Days

Technijian already runs Pet Care Plus' search marketing — the weekly SEO program, Google Ads across five campaigns, analytics, and call tracking. This is the next layer: turning that foundation into an AI-driven growth and retention engine for a resort with assets no Chicago rival can copy quickly — the city's only heated saltwater pool, true 24/7 care, a real cat suite, and a single-owner reputation since 1998. The plan closes the gap with the market's reputation leader (Tucker Pup's) and its technology leader (Wag Hotels) on three fronts: get found, book faster, and keep & grow.

The Core Opportunity

Turn the physical moat into a digital moat — own the local-search and AI-answer position no Chicago rival has claimed, on the pool, 24/7, and cat-boarding stories nobody else tells.

Stop the booking leak — replace the 24-hour callback for new customers with instant booking and second-fast response: recovered conversion on demand the ads already pay for.

Build the retention flywheel nobody else has — a membership / "Pool Club" program that turns daycare regulars into recurring revenue.

The Opportunity

Pet care is one of the fastest-growing service categories in the country, and owners now choose and book a resort almost entirely online. Three forces decide who wins.

Force	What's Happening	What It Means for Pet Care Plus
Booking is digital	84% of owners say online booking matters; 89% want reminders; under-35 owners switch over slow response	The 24-hour callback is the biggest gap to close — instant booking is table stakes
Reviews decide the shortlist	88% of under-35 owners check reviews before choosing	Review velocity widens the lead on demand already attracted
AI answers are the new front page	~25% of search shifts to AI assistants by 2026; AI now names local businesses	First mover owns the cited answer for West Loop pet care
Membership is the margin lever	Labor ~45% of revenue; resorts target 60–70% weekday occupancy to break even	A membership program builds recurring revenue and fills mid-week troughs

Why Pet Care Plus Wins This

The moat is physical and real: a 28-year single-owner reputation, the only heated saltwater pool in Chicago, true 24/7 staffing, and a cat suite — hard to copy, and almost entirely unmarketed online.

The foundation is already in place: Technijian runs the search marketing today, so this program compounds what is in flight rather than starting over.

How AI Grows Pet Care Plus

The engine runs three motions at once — get found (own local search and AI answers, build review velocity, tell the pool and cat-boarding stories), book faster (replace the 24-hour callback with instant booking and second-fast response), and keep & grow (a membership program, a branded app, and win-back that compound the regulars). Every part builds on the search foundation Technijian already runs.

Pet Care Plus AI Engine - Get Found, Book Faster, Keep & Grow

Capture local demand on the left, convert it faster in the center, and build the retention flywheel on the right.

* My SEO - My AI Lead Gen - My Dev - My AI, built on the SEO + Google Ads foundation Technijian already runs for Pet Care Plus. AI augments the front desk and care team; it does not replace them.

The Engine: Get Found, Book Faster, and Keep & Grow

The Three Motions

1 — Get Found

Own "dog boarding / daycare / grooming West Loop," "dog pool Chicago," and the cat-boarding queries in Google and AI answers; build automated review velocity toward the market leader; and finally tell the pool and 24/7 stories at the scale they deserve. Fix the 31/100 mobile speed that quietly costs rankings and bookings.

2 — Book Faster

Replace the 24-hour booking callback for new customers with instant online booking and a second-fast text-back, plus an AI front desk that answers hours, availability, and vaccine rules around the clock. This converts the demand the ads already pay for — before it cools.

3 — Keep & Grow

Launch the membership / "Pool Club" program no independent Chicago rival offers, a branded booking-and-webcam app to match the technology leader, automated stay photos, and win-back for lapsing regulars. Turn one-time stays into recurring revenue.

The Honest Boundary

AI augments the front desk and the care team — it does not replace the people and the dogs that are the whole point. It integrates around the booking system Pet Care Plus already uses; it extends that workflow, it does not rip and replace.

The Program

Start small and build on the search foundation already running. The entry program uses real published Technijian rates and pays for itself on the booking fix and review velocity alone — with no large build to begin. The bigger build (the app and the membership platform) comes later, once the entry proves the lift.

Entry Program	What It Does	Investment
My SEO — Answer-Engine, Local & Reviews	Already engaged — expand the current program (AEO, review engine, technical fix, pool/cat content)	In place
My AI Lead Gen — Capture & Speed-to-Lead (Starter)	Second-fast text-back, AI front desk, nurture to booking — the main new entry cost	\$1,499/mo* + \$2,500 setup
My AI — Review Engine + AI Readiness Workshop	Review-velocity program + leadership alignment and roadmap	TBD — discovery
ENTRY PROGRAM	Builds on the My SEO in place; new cost = Lead Gen Starter + TBD items	In place + new

* Pet Care Plus is already engaged on My SEO, so that program is in place and this plan expands its scope. The main new entry cost is My AI Lead Gen Starter — \$1,499/mo plus a one-time \$2,500 setup (published). The custom build (instant booking, the branded app, and the membership / Pool Club platform), managed services, and the advisor are the Phase-2 expansion, scoped in discovery — no invented numbers.

How We'll Measure the Return

We do not lead with a multiple we cannot back. Year-1 return is modeled from real levers — recovered booking conversion, review-driven new demand, and membership recurring revenue — each tied to a number Pet Care Plus already tracks in its analytics and call tracking. Targets are set from those baselines in discovery. Illustrative until then — no number we can't back.

The Roadmap & Next Step

90 / 180 / 270 Day Growth Roadmap

Pet Care Plus - Technijian program. Build on the SEO foundation, convert demand faster, then grow retention.

* New-customer, booking-conversion & membership targets calibrate after a 30-min discovery call (see the Questions section). Estimates shown are illustrative, not a quote.

90 / 180 / 270-Day Roadmap: Foundation, Growth, then Scale & Retention

Recommended Next Steps

Step 1: A 30-minute discovery call to confirm the baselines (most are already in your analytics and call tracking) and the program scope.

Step 2: Technijian returns a calibrated model and a fixed-scope Statement of Work within 5 business days.

Step 3: Phase 1 kickoff — instant booking for new leads, the review engine, and the technical fix — live inside 30 days.

We already run your search marketing. Let's turn it into a growth engine.
