COST / LEAD

The Lead Gen Problem

Every sales team needs pipeline — but the tools to get it are expensive, stale, generic, and produce lists your competitors already bought. AI and public data change the math entirely.

Apollo/ZoomInfo Tax

\$25K–\$60K seat licenses for recycled contact lists that every competitor also has. Stale data, generic firmographics, zero intent.

→ Public data + AI enrichment at 1/10th the cost

Generic Lists, No ICP Fit

Bought lists ignore your actual ideal customer. SDRs waste weeks qualifying out 80% of contacts who were never a fit.

→ Pipelines tuned to your exact ICP from day one

Dead Leads by the Time You Email

Monthly list uploads mean you chase contracts, permits, and loans that already closed. First-mover advantage is gone.

→ Daily refresh on fresh awards, filings & permits

Raw Data, Not Outreach

Even good lists dump CSVs on you. Your team still has to research, enrich, write emails, and build cadences from scratch.

→ Enriched records + personalized drafts delivered weekly

Why AI Lead Gen Now?

- ▶ Public data lakes (SAM.gov, USASpending, SBA, state DOTs, county recorders, city permits) are richer than ever — but unstructured
- ▶ Claude, GPT-4o, and MCP-based scraping now make it economical to harvest, parse, and enrich at scale
- ▶ Fresh intent signals (new contracts, new loans, new permits) beat any purchased list — and they refresh daily for free
- ▶ Competitors still pay Apollo. The teams that switch to AI-driven public-data pipelines compound a 3–5x pipeline velocity advantage

The Pipeline

Four production stages — each self-healing, scheduled, and tuned to your ICP — running on autopilot every day and week.

Harvest

Ingest from 10+ public & private sources on daily/weekly cadence.

- ✓ SAM.gov & USASpending federal contracts
- ✓ SBA 504 / 7(a) loan data, state DOT awards
- ✓ County permits, UCC filings, clerk-recorder
- ✓ City building permits & plan-check data
- ✓ HOA ARC, story poles, just-sold properties

Enrich

AI + API enrichment to build full business, property & contact records.

- ✓ Apollo + BatchData contact & role discovery
- ✓ ATTOM property, Spokeo ownership lookup
- ✓ Claude deep search for hidden leads
- ✓ Firmographics, tech stack, spend signals
- ✓ Geocoding, HOA match, architect-of-record

Score

ICP-fit, dedup, intent ranking — ready for prioritized outreach.

- ✓ Client-fit scoring vs. your ICP definition
- ✓ Identity resolution & cross-source dedup
- ✓ Tier 1 / 2 / 3 auto-categorization
- ✓ Recency-weighted intent decay
- ✓ Self-healing pipelines with learning loop

Deliver

Outreach-ready artifacts drop in your inbox, CRM, or Obsidian vault.

- ✓ Enriched CSVs for HubSpot / Salesforce / Pipedrive
- ✓ Personalized email drafts (HTML + plain text)
- ✓ Weekly DOCX + PDF lead reports for leadership
- ✓ Obsidian vault sync for research context
- ✓ Optional SDR handoff & cadence automation
