18 Technology Dr. is **five minutes** from 16 Hughes. We're the local managed-IT partner that's been here as long as you have — and we run the platform CardLogix needs to scale into CJIS-grade law-enforcement deals.

TWO CONVERSATIONS

TRACK A · YOUR SHOP

Nick decides

Co-Managed IT for your 5–6 workstations + 2 servers

You keep strategic control. We absorb the toil — 24/7 monitoring, patching, after-hours coverage, M365 hardening, the second pair of eyes on incidents. The model is purpose-built for owner-operator IT shops that have outgrown the solo run.

- ✓ After-hours & overflow help desk; ITIL ticketing
- ✓ Shared RMM, patch management, asset inventory
- ✓ Senior architects on demand for projects
- ✓ Security & compliance co-ownership built in

TRACK B · LE CUSTOMERS

Goulet + Hope approve

CJIS / MFA partnership for your law-enforcement deals

You make the credentials. We make the agency's environment CJIS-ready around them. A channel-style partnership where Technijian wraps managed-IT + MSSP + CJIS compliance around your PIV / FIDO2 / FRAC hardware — so you don't lose deals to HID's tighter ecosystem.

- ✓ Card lifecycle & Entra ID / AD integration at the agency
- ✓ 24/7 SOC with 15-minute critical SLA on the wrap
- ✓ Audit-evidence packs an LE-agency CSO can hand to a state auditor
- ✓ Co-sell motion designed for your existing channel

WHY NOW · CJIS MARKET TIMING

Phishing-resistant MFA has been mandatory since Oct 1, 2024.

CJIS Security Policy 5.9.5 (Jul 2024) made multi-factor authentication non-negotiable for every account that touches CJ!; 6.0 (Dec 2024) tightened password & MFA further. SMS-MFA is out. **PIV-class smart cards and FIDO2 keys are explicitly what satisfies it** — which is exactly what CardLogix already sells.

The hardware solves \$5.6 Identification & Authentication. The other twelve policy areas are what Technijian wraps.

THE TECHNIJIAN STACK

My IT

Managed & co-managed. 24/7 NOC + U.S.-based help desk. vCIO leadership for the strategic layer.

My Security

24/7 SOC, 15-min critical SLA. EDR + SIEM + email security + MFA-everywhere + conditional access.

My Compliance

Eight frameworks supported today; vCCO / vCISO; audit-prep sherpa; evidence collection automation.

My Dev / My AI

Custom builds, AI Document Intelligence, knowledge graphs, agent & workflow automation.

DIFFERENTIATOR

My Jian — our own cross-vendor SIEM & compliance platform

Built and operated by Technijian. Ingests across every layer of the stack we run for ourselves and our clients — correlated in real time, MITRE ATT&CK-tagged, with 31 continuous compliance evaluators and a branded monthly DOCX report per environment.

Sophos syslog INKY email CrowdStrike Huntress Meraki
Veeam / NAKIVO Cisco Umbrella DNS vCenter Cloudflare
M365 × 22 workloads

MY COMPLIANCE — FRAMEWORK COVERAGE

HIPAA SOC 2 PCI-DSS CMMC / DFARS GDPR / CCPA
NIST CSF CIS Controls ISO 27001 + CJIS

CJIS is the natural ninth — same NIST 800-53 control families as our CMMC practice. ~90-day stand-up path from a real partnership trigger; we have not delivered CJIS engagements yet, so we frame it honestly as a near-term build, not a track record.
