

Monaco Wheels & Auto Restyling

Revised Program Summary — Corrected Numbers & Performance-Aligned Pricing
Prepared for Jovan Giles | by Ravi Jain, Technijian

\$0
UPFRONT BUILD

\$40
PER BOOKED JOB

100%
TRACKED

You pay as we produce. Every lead and booked job is tracked in a dashboard you can open any time.

CORRECTED REVENUE MIX

Page 5 — your correction

Wheel Repair Channel	Volume / mo	Revenue / mo
In-shop — 40%	96 wheels	\$12,000
Mobile — 60%	144 wheels	~\$23,300
Calipers, chrome & wraps	combined	~\$13,350
Total estimated monthly		~\$48,700

THE SHOP-SHIFT OPPORTUNITY

Mobile is now 60% and climbing — but it costs you more per job and caps how many wheels you finish in a day. Pulling that demand back into the shop is the fastest way to lift throughput and margin without adding staff. **Steering bookings to the shop is now a core objective of the program**, not an afterthought.

TRACKING IS THE PROOF

- ✓ **A dedicated tracked phone number** — every call we generate is logged and recorded.
- ✓ **Form & booking tracking** — each online request tagged to its source.
- ✓ **A live booked-job dashboard** — open it any time to see what we brought you.
- ✓ **A monthly source report** — exactly which jobs came from us, and what they were worth.

NO MORE THROWING MONEY AT A PROMISE

If the program isn't producing, you'll see it before I do. The numbers below are illustrative — the dashboard shows the real ones.

PERFORMANCE-ALIGNED PRICING

\$750

/ month

Program base

Local SEO & Map Pack, before/after content + review engine, and the full tracking & attribution dashboard.

\$40

/ booked job

Performance fee

Only on net-new jobs we book and attribute to us. Your repeat customers, walk-ins, and dealer work are never billed.

\$0

upfront

Custom build deferred

The quote-bot & CRM build comes later, funded from proven gains — not a \$15,000 commitment today.

WHAT YOU'D ACTUALLY PAY

illustrative

In a...	New jobs we book	You pay / mo
Slow month	15	\$1,350
Break-even vs. old plan	25	\$1,750
Strong month	50	\$2,750

READ THIS LINE

You only reach the old flat fee once we've booked you **25 net-new jobs in a month** — every one of them visible in your dashboard. Below that, you pay less. Above it, the bill grew only because your revenue grew first.

THE FIRST 30 DAYS — PROOF BEFORE YOU SCALE

WEEK 1

Tracking goes live

A dedicated tracked number, form tracking, and your live dashboard are stood up. We capture a clean baseline so every gain afterward is measurable.

WEEKS 2-3

The engine launches

Shop-first booking flow, Google Map Pack optimization, and the before/after content + automated review-request system go to work.

WEEK 4

First jobs land

Attributed bookings start showing in your dashboard. We review the real numbers together and decide what to scale — nothing on faith.

Month-to-month, cancel anytime. **You own the tracking number and all the data.** No long-term contract, no \$15,000 build, and you never pay for a lead that doesn't turn into booked work.

Let's walk through the dashboard and the numbers — 20 minutes this week.
