Sabre

Core booking platform

Pacific Arena is a Singapore travel group operating since 1976 (originally P&O Travel, rebranded 2003) that trades through a portfolio of brands — PriceBreaker Corporate for business travel, PriceBreaker for leisure, Accolade for MICE, and Cruise Arena — and is a perennial Singapore Airlines Top Agent. Its corporate arm already runs Sabre and a PDPA/GDPR-compliant client portal. This summary shows where AI builds on that foundation — on two fronts — and states only verified facts, deferring every company-specific number to discovery.

Win more travellers and accounts. AI authority content and search visibility make Pacific Arena the answer travellers find (a gap today); account and tender intelligence help win and keep corporate programmes. **Serve faster and run leaner.** AI-drafted itineraries and quotes, a customer-service virtual agent, fare re-shopping, ticketing automation that extends Sabre, and visa-document processing — every booking still confirmed by a consultant, all data PDPA-governed.

What we verified

- **A brand portfolio, not one agency:** PriceBreaker Corporate (TMC), PriceBreaker (leisure), Accolade (MICE), Cruise Arena, plus visa services — under STB licence TA00249.

- **A real tech base already:** Sabre, "Robotics Assist" automation, and a proprietary PCI/DPDA/GDPR-compliant client portal, within the global ATG/AllStars alliance.
- **PE-originated, not family-held:** was P&O Travel (Singapore) until a 2003 acquisition; current ownership is a discovery item, not an assumption.
- **A quiet consumer front door:** dated websites, no published travel content, and a thin review footprint — the clearest, lowest-cost place to start.

The one idea

OTAs win on digital but not service; traditional agencies win on service but not digital. Pacific Arena has both the service depth and a real tech base — so AI lets it deliver high-touch travel expertise at digital speed and scale, the lane almost no mid-market agency occupies yet.

The engine

Three columns: win more travellers and accounts, serve them faster with AI, and automate the back office around Sabre — each delivered by a specific Technijian service.

Pacific Arena AI Growth & Integration Engine

Win more travellers and accounts (left); serve them faster with AI (centre); automate the booking back office around Sabre (right).

* My SEO · My AI · My AI Lead Gen · My Dev. AI augments consultants and the Sabre + Client Portal stack — a human signs off every booking, and traveller data stays in private, PDPA-gov.

Investment & the path forward

No invented numbers. We price from real, published Technijian service ranges and model ROI only after discovery — on consultant hours recovered, conversion, and savings captured, not on a guessed revenue figure. The path is land-and-expand: prove one automation and the content layer, then scale across brands. (Our India delivery team overlaps Singapore business hours, which makes us a practical partner here.)

The easiest first step is a short discovery call — a working session on where AI creates measurable value for Pacific Arena, with no obligation. Or begin with a half-day AI Readiness Assessment that maps your Sabre and portal workflows and returns a prioritised, costed roadmap. The full blueprint ends with a structured questionnaire — "Questions to Complete the Analysis" — that turns this summary into a costed plan.
