

Multi-model AI for healthcare — HIPAA-compliant architecture, PHI protection, clinical knowledge retrieval, and full audit trails from day one.

HEALTHCARE AI CAPABILITIES

HIPAA-Ready Architecture

- ✓ BAA (Business Associate Agreement) signed with Technijian
- ✓ Row-level tenant isolation — no PHI cross-contamination
- ✓ Azure/AWS HIPAA-eligible services only, encrypted at rest/transit
- ✓ Automatic PHI redaction in prompts & logs

Clinical Knowledge Retrieval (RAG)

- ✓ Ingest protocols, clinical guidelines, formularies, policies
- ✓ Semantic search across clinical documentation
- ✓ Cited, traceable answers with source attribution
- ✓ Role-based access (MDs, nurses, admin, billing)

AI Council for Clinical Accuracy

- ✓ 3+ models cross-validate clinical responses
- ✓ >30% reduction in hallucinations vs single model
- ✓ Critical for any decision-support use case
- ✓ Confidence scoring surfaces uncertain answers for human review

Governance & Audit

- ✓ Every query logged with user, timestamp, model, response
- ✓ Configurable PHI detection & auto-alerting
- ✓ On-premise deployment option for data sovereignty
- ✓ SOC 2 Type II, HITRUST roadmap, SSO via Azure AD

HEALTHCARE USE CASES

- Clinical Decision Support** — Cited answers from your protocols & guidelines
- Prior Auth & Documentation** — AI-drafted notes, PA forms with PHI protection
- Revenue Cycle & Appeals** — Denial analysis & appeal drafting
- Staff Training & Policy Q&A** — Instant answers from handbooks & policies

HIPAA SAFEGUARDS BUILT IN

HIPAA Requirement	ChatGPT	Copilot	Chat.AI HC
BAA with provider	Enterprise	Enterprise	✓ Standard
PHI auto-redaction	—	—	✓ Default
Tenant isolation	—	Partial	✓ Full
On-premise option	—	—	✓ Full stack
AI Council accuracy	—	—	✓ 3+ models

WHY CHAT.AI FOR HEALTHCARE

- **BAA Signed:** HIPAA compliance is table stakes — not an enterprise-only upgrade
- **PHI Protection Default:** Auto-redaction of 18 HIPAA identifiers before AI providers see data
- **Clinical Accuracy:** AI Council cross-validates with 3+ models on care-adjacent answers
- **Data Sovereignty:** On-premise or HIPAA-eligible Azure/AWS — data never leaves your control
- **Cited Answers & RBAC:** Clinicians verify sources; roles restrict who sees what

HEALTHCARE PRICING

Plan	Monthly	Users	BAA	PHI
Clinic Starter	\$499	25	✓	Auto-redact
Practice	\$1,299	100	✓	+ Audit retention
Hospital	\$2,499	250+	✓	+ SOC 2
On-Premise	Custom	Unltd	✓	Full stack

All plans include BAA • HIPAA-eligible Azure/AWS • AI Council standard on Practice+

HIPAA & CLINICAL SAFEGUARDS

- ✓ BAA Agreement
- ✓ 18 HIPAA Identifiers
- ✓ PHI Auto-Redaction
- ✓ 6+ Year Audit Retention
- ✓ Row-Level Tenant Isolation
- ✓ Clinical RBAC
