The Challenge with Enterprise AI Today

Organizations face real barriers adopting AI at scale. Chat.AI was built to solve each one.

Single-Vendor Lock-In

Tying your organization to one AI provider means you inherit their outages, pricing changes, and model limitations.

- Chat.AI orchestrates OpenAI, Anthropic, Google, and Azure simultaneously with automatic failover.

No Cost Visibility

ChatGPT Team and Copilot charge flat per-seat fees with no transparency into actual token consumption or model costs.

- Per-call cost attribution, prepaid budgets, and overage alerts give you complete financial control.

Hallucinations & Unreliable Output

Single-model responses have no checks or balances. Users can't tell when the AI is confidently wrong.

- AI Council deliberation across 3+ models reduces hallucinations by over 30% with consensus validation.

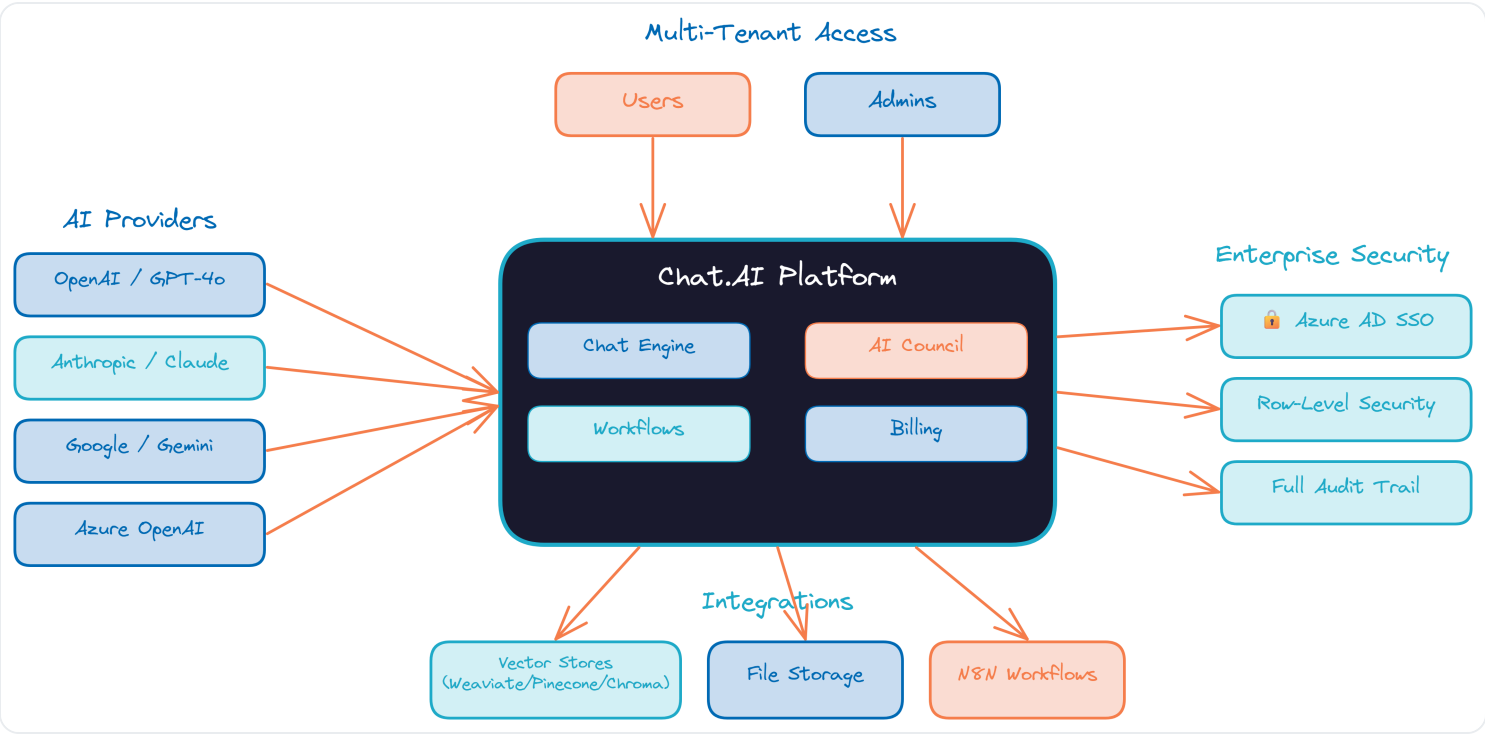

Security & Compliance Gaps

Consumer AI tools lack tenant isolation, audit trails, and the controls required for regulated industries.

- Row-level security, stored-procedure-only data access, full audit logging, and HIPAA/SOC 2 architecture.

Platform Capabilities

Everything your organization needs to adopt AI securely and effectively.

Multi-Model Chat

Conversational AI powered by GPT-4o, Claude Sonnet, Gemini Pro, and more. Switch models mid-conversation or let the platform route automatically.

- ✓ Streaming responses (SSE)
- ✓ File attachments & analysis
- ✓ Thread sharing with permissions
- ✓ Export & history

Custom AI Assistants

Create purpose-built AI assistants with custom system instructions, connected data sources, and attached connectors.

- ✓ Per-assistant model selection
- ✓ Connector integrations (REST, GraphQL, DB)
- ✓ Shared or private assistants
- ✓ MyGPTs for personal productivity

Projects & Workspaces

Organize chats, files, and instructions into project containers with inherited context and granular sharing.

- ✓ Project-level system prompts
- ✓ Shared files & knowledge
- ✓ View/edit permissions
- ✓ Cross-chat context inheritance

Workflow Automation

Knowledge & Memory

Billing & Cost Controls

Trigger N8N workflows directly from chat. Extract parameters from conversation context and execute multi-step business processes.

- ✓ Chat-initiated workflow triggers
- ✓ Parameter extraction from context
- ✓ Run tracking & cost attribution
- ✓ Per-tenant workflow instances

Upload documents, vectorize content, and give your AI assistants persistent organizational memory with RAG capabilities.

- ✓ Weaviate, Pinecone, or Chroma
- ✓ File vectorization & embedding
- ✓ Semantic similarity search
- ✓ Per-tenant vector stores

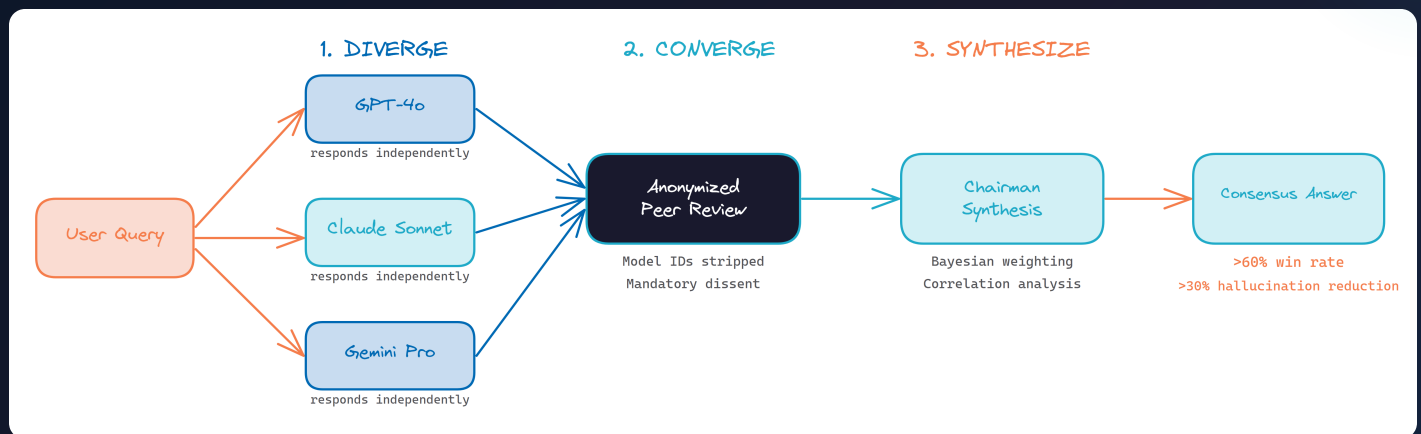

Prepaid balance model with token-level metering, per-model cost breakdowns, and automatic budget alerts before overages hit.

- ✓ Per-call cost attribution
- ✓ Budget alerts at 75% & 100%
- ✓ Per-user & per-model tracking
- ✓ Invoice generation

PATENT PENDING

AI Council — Collective Intelligence

3+ diverse models deliberate through a structured pipeline — more accurate answers, dramatically fewer hallucinations.

How Chat.AI Compares

Feature-for-feature, Chat.AI delivers more value at a lower total cost than consumer AI tools.

Capability	ChatGPT Team	Microsoft Copilot	Google Gemini Business	Technijian Chat.AI
Multi-model access	OpenAI only	OpenAI only	Google only	✓ 4+ providers
AI Council (consensus)	—	—	—	✓ Patent pending
Per-call cost attribution	—	—	—	✓ Token-level
Workflow automation	GPTs only	Power Automate (extra \$)	—	✓ N8N built-in
Multi-tenant isolation	—	Basic	Basic	✓ Row-level security
Full audit logging	—	Limited	Limited	✓ SP-enforced
Custom vector stores	OpenAI only	—	—	✓ Weaviate / Pinecone / Chroma
On-premise deployment	—	—	—	✓ Term license
Budget controls & alerts	—	—	—	✓ 75%/100% alerts
Price (25 users)	\$625/mo (\$25/seat)	\$750/mo (\$30/seat)	\$500/mo (\$20/seat)	\$899/mo (flat, 50 seats)

What You Save

Real cost comparisons for typical organizations switching to Chat.AI.

SMALL TEAM
10-Person Office

ChatGPT Team (10 seats)	\$250/mo
+ Zapier for automation	\$69/mo
+ Pinecone for RAG	\$70/mo
Current total	\$389/mo
Chat.AI Starter	\$299/mo

Annual savings \$1,080

MID-MARKET
50-Person Company

Copilot Pro (50 seats)	\$1,500/mo
+ Power Automate Premium	\$750/mo
+ Azure AI Search	\$250/mo
Current total	\$2,500/mo
Chat.AI Growth	\$899/mo

Annual savings \$19,212

ENTERPRISE
250-Person Organization

ChatGPT Enterprise (est.)	\$15,000/mo
+ Custom RAG pipeline	\$2,000/mo
+ Compliance tooling	\$1,500/mo
Current total	\$18,500/mo
Chat.AI Enterprise S	\$3,999/mo

Annual savings \$174,012

Enterprise-Grade **Security & Compliance**

Built for regulated industries from the ground up, not bolted on after the fact.

tenant, per-
endpoint
throttling

Flexible **Deployment**

Your AI, your way. Cloud or on-premise — same platform, same capabilities.

Cloud (SaaS)

Fully managed on Azure with automatic updates, monitoring, and 24/7 global support from our U.S. and India offices. Zero infrastructure overhead for your team.

Starting at \$299/mo • No setup fees

On-Premise (Term License)

Deploy inside your own infrastructure for maximum data sovereignty. Ideal for regulated industries, air-gapped environments, and strict data residency requirements.

Starting at \$45,000/yr (50 users) • Includes support

About Technijian

Technology as a solution since 2000.

Founded in 2000 by Ravi Jain, Technijian has grown from a single-consultant operation into a full-spectrum IT services company with offices in Irvine, California and India. For over 25 years, we've served small and mid-sized businesses with managed IT, cybersecurity, cloud infrastructure, compliance, and AI-driven solutions.

Our **Technijians Pod Model** assigns a dedicated team to each client — so you get people who truly know your infrastructure, not a rotating cast of strangers. With 24/7 global support at no extra cost, we deliver enterprise-grade technology with the responsiveness of a dedicated partner.
