WHY THESE PRICES THE COMPARABLES

vs. a custom AI-agent build

Industry: **\$25K-\$300K+** to build one. Our engine does ~80% of the work — you fund only your app's logic, so build starts at **\$6,000**.

vs. APM (Datadog / New Relic)

\$500-\$1,500+/mo of host/span telemetry for one platform — and blind to “billed but never sent.” We watch the **money**, not the plumbing.

vs. AMS / RCM software

Maintenance runs **15-20% of build/yr**; RCM tools hide behind “% of collections.” Ours is a **transparent flat fee**.

Start with a free 2-week pilot on one data source.

We watch one feed read-only for two weeks — then quote the build and the tier. No build fee until you've seen it catch something.
