

Shoes That Fit — AI Growth & IT Readiness

A record \$776,000 gift and a year of scaling raise the stakes on two fronts: **protect** the money and donor data, then **grow** the corporate-partner engine with AI. Built for whoever leads technology and growth — from public facts only.

1992

Founded · national 501(c)(3)

~218K

Children a year, all 50 states

3M+

Pairs of new shoes since 1992

\$776K+

Largest-ever gift · Stater Bros.

A gift this size, announced this publicly, is both an opportunity and a target — and the same engine that protects it can grow the partnerships that produced it.

FOUNDATION — SECURE & SCALE

- **Payment & email fraud controls** — verify every transfer so a publicized gift can't be hijacked.
- **Identity & device security** — MFA and endpoint protection for a 44-person team.
- **Microsoft 365 grant-cliff migration** — re-license cleanly after the 2025 nonprofit change.
- **Free Nexus Assess baseline** — one no-cost risk assessment, dark-web and M365 review.

GROWTH — RAISE & REACH

- **Corporate-partner ABM** — look-alike prospects and renewal signals for the #1 engine.
- **Grant discovery & drafting** — match funders and draft faster; staff write the case.
- **Donor reactivation** — segment and re-engage lapsed and mid-tier donors.
- **Impact stories & CSR reports** — per-partner reports that win the next gift.

THE ENTRY

Start with the free Nexus Assess and the free/discounted nonprofit stack — including up to \$10,000/mo in free Google Ad Grants — then one growth automation. Affordable by design; we scope the rest to your budget and grant cycles.

HOW WE MEASURE RETURN

In dollars raised, staff hours recovered, children reached, and risk avoided — not a revenue multiple. Conservative, mid, and upside numbers come after a short discovery call gives us your real figures.

Start with the free assessment and a 30-minute working session.
