

ACUITY ADVISORS

AI Growth & Integration Strategy — Executive Summary

Prepared by Technijian | 2026-06-02 | Santa Ana, California | acuityadvisors.com

1989

Advising Since

West Coast

Largest ESOP Practice

M&S

Backed (2024)

CFA·ASA

Credentialed Team

Technijian already runs and secures Acuity's environment — the managed IT, endpoint defense, and Microsoft 365 hardening a confidential advisory firm depends on. This is the next layer: turning a relationship built on trust and security into a growth engine, built inside the perimeter we already protect. For an M&A and ESOP firm, security is the precondition for using AI at all — and it is the firm's advantage, not its limit.

The Core Opportunity

Own the answer no one has claimed — the entire category is answer-engine-blind; the owner-education and "M&A vs. ESOP vs. family" decisions owners research first are unowned by the deal banks, and Acuity uniquely does both.

Turn thirty-five years into a visible asset — a credentialed, Marshall & Stevens-backed, West-Coast-leading ESOP practice whose real proof is un-merchandised online.

Build AI where it is safe — because Technijian secures the perimeter, the deal-preparation and knowledge AI lives inside it, not in a public chatbot. That confidentiality boundary is the differentiator.

The Opportunity

Three forces converge in Acuity's favor: a demographic wave of owners who must transition, an ESOP tailwind that rewards the credentialed, and a moment when both owners and AI engines decide credibility online.

Force	What's Happening	What It Means for Acuity
The succession wave	~2.9M U.S. businesses owned by people 55+; ~73% plan a transition within a decade	Structural, rising demand — the authority owners trust wins the early conversation
The planning gap	Only ~19% of boomer owners have started planning; only 20–30% of marketed businesses sell	Acuity sells preparedness and execution into the gap
ESOP tailwinds	~6,600 ESOPs, \$2T+ assets; the WORK Act and 2025 legislation favor employee ownership	The West Coast's largest ESOP practice is positioned for it
Owners decide online	They research "ESOP," "sell my business," "valuation" first — and the category is answer-engine-blind	First mover owns the cited authority no deal bank has claimed

Why Acuity Wins This

The moat is real: CFA/ASA credentials, the West Coast's largest ESOP practice, a Marshall & Stevens platform, and a thirty-five-year track record — hard to replicate, simply uncaptured online.

The foundation already exists: because Technijian secures the environment, the program compounds a relationship in place rather than starting over.

How AI Grows Acuity

The engine runs three motions at once — get cited (own the owner-education and decision content that earns authority), win the referral and the owner (intelligence on the advisors who send deals and the owners showing signals), and run leaner and remember (secure, in-perimeter deal-prep AI and a thirty-five-year knowledge system). Every part builds on the security foundation Technijian already runs — and respects the boundary that protects the firm.

Acuity AI Engine - Get Cited, Win the Referral & Owner, Run Leaner & Remember

Build authority on the left, arm the partners against named accounts & referrers in the center, and raise revenue-per-professional on the right.

GET CITED authority owners & AI engines find	WIN THE REFERRAL & OWNER account-based, under your relationships	RUN LEANER & REMEMBER secure, in-perimeter
Answer-Engine + Owner Education Own 'what is an ESOP', 'ESOP vs sale', 'sell my business' in Google & AI answers. My SEO	Referral (COI) Intelligence Map and nurture the CPAs, attorneys & wealth advisors who send deals. Lead Gen	Institutional-Knowledge System 35 years of deals into matched precedents for the next pitch. My AI
M&A-vs-ESOP Decision Hub Acuity does both - own the trade-off owners agonize over. My SEO	Owner Transition Signals Flag businesses showing succession, age, or industry signals for outreach. My AI	Due-Diligence Review Flag change-of-control, indemnity & liabilities ~70% faster. My Dev
Proof Scoreboard 35 years + hundreds of ESOP deals, finally merchandised and searchable. My SEO	Pitch / CIM / Proposal Accel First-draft pitchbooks, teasers & proposals from past work - securely. My Dev	Financial Spreading Support First-pass spreads & comps the credentialed pro verifies and signs. My AI
Local SoCal / OC Content Claim 'sell my business Orange County' from brokers and law firms. My SEO	Relationship Intelligence Warm-intro paths and COI tracking inside the Dynamics CRM you run. My AI	On Your Secure Perimeter Built inside the IT & security Technijian already runs - not a public chatbot. My IT

* My SEO - My AI Lead Gen - My Dev - My AI, built INSIDE the security perimeter Technijian already runs for Acuity. AI assists; the credentialed professional signs; confidential deal data never

The Engine: Get Cited, Win the Referral & Owner, and Run Leaner & Remember

The Three Motions

1 — Get Cited

Own "what is an ESOP," "ESOP vs. selling," and "business valuation" in Google and AI answers; publish the "M&A vs. ESOP vs. family" decision content only Acuity can own; and merchandise thirty-five years of track record into searchable proof. The whole category is answer-engine-blind — first mover earns compounding, credible authority.

2 — Win the Referral & the Owner

Map and nurture the CPAs, attorneys, and wealth advisors who send the deals — the #1 acquisition channel — and flag owners showing transition signals for the partners. Account-based and relationship-led: AI supports the introduction, it does not manufacture volume.

3 — Run Leaner & Remember

Secure, in-perimeter AI that speeds CIMs, teasers, proposals, and diligence, and turns thirty-five years of deals into matched precedents — raising the engagements each credentialed professional can carry.

The Boundary Is the Differentiator

AI assists; the CFA/ASA professional signs every valuation and opinion; confidential deal data never touches public AI. A confidential firm cannot use the public-AI shortcut its peers reach for — so the firm that builds AI safely, inside its perimeter, gains an advantage that is hard to copy. Technijian already secures that perimeter.

The Program

Acuity's managed IT and security are already in place — this adds the growth layer on top. The entry program uses real published Technijian rates and makes the firm's authority visible; the secure deal-prep build comes later, once the entry proves the lift. No invented numbers.

Entry Program	What It Does	Investment
Managed IT + Cybersecurity	The secure foundation the growth program builds inside	In place
My SEO — Answer-Engine, Owner Education & Local	AEO + decision hub + proof scoreboard + local content (new for Acuity)	\$500–\$1,500/mo*
My AI Lead Gen — Referral & Account Intelligence (Starter)	COI intelligence + owner transition signals; relationship-led	\$1,499/mo* + \$2,500 setup
My AI — Readiness Workshop + Content Engine	Leadership alignment, the boundary, and the content engine	TBD — discovery
ENTRY PROGRAM	Builds on the IT + security in place; new cost = My SEO + Lead Gen Starter + TBD item	In place + new

* Real published Technijian list rates. Acuity's managed IT and security are already in place and are not re-priced. My SEO is new for Acuity — published tiers run \$500–\$1,500/mo; My AI Lead Gen Starter is \$1,499/mo plus a one-time \$2,500 setup. The secure deal-prep build (CIM / teaser / proposal + diligence + the institutional-knowledge system), managed services, and the advisor are the Phase-2 expansion, scoped in discovery — no invented numbers.

How We'll Measure the Return

We do not lead with a multiple we cannot back. Year-1 return is modeled from real levers — authority inbound, referral activation, and revenue per professional — each tied to a number Acuity already tracks. Targets are set from those baselines in discovery, and in this market a single additional engagement can outweigh the entire program cost. Illustrative until then — no number we can't back.

The Roadmap & Next Step

90 / 180 / 270 Day Growth Roadmap

Acuity - Technijian program. Build authority, activate referrals, then scale a secure deal-prep and knowledge engine.

* Engagement, referral & fee targets calibrate after a 30-min discovery call (see the Questions section). Estimates shown are illustrative, not a quote.

90 / 180 / 270-Day Roadmap: Foundation, Authority & Referral, then Scale & Remember

Recommended Next Steps

- Step 1: A 30-minute discovery call to confirm the baselines and the program scope.
- Step 2: Technijian returns a calibrated model and a fixed-scope Statement of Work within 5 business days.
- Step 3: Phase 1 kickoff — the answer-engine foundation, the decision hub, and the proof scoreboard — inside 30 days.

We already secure your environment. Let's turn it into a growth engine.
