WHAT'S IN EVERY MONTHLY REPORT

Alert Activity & Auto Tickets
Every alert detected hourly. New alert = CP ticket in under 60 min, billable to contract. 24h aging escalation.

IPS/IDS & ATP Threat Intel
Per-signature IPS events, ATP malware callbacks, C2 detections — top attackers, targeted hosts, MITRE mapping.
Advanced+

Web Filter & Traffic Analytics
Top blocked categories, per-user violations, SSL inspection coverage, top talkers, bandwidth anomalies.
Advanced+

Findings & Recommendations
P1/P2/P3 action list — unresolved ATP hits, firmware drift, IPS volume trends — with effort and risk estimates.
