

CMMC 2.0 compliance for DoD primes and subs — CUI scoping, NIST 800-171 implementation, DFARS 7012 reporting, and C3PAO assessment prep.

CMMC CAPABILITIES

CUI Scoping & Data Mapping

- ✓ FCI / CUI identification across email, SharePoint, CAD, ERP
- ✓ Data flow mapping & enclave boundary design
- ✓ Subcontractor & ESP inventory
- ✓ CUI marking and handling procedures

NIST 800-171 Implementation

- ✓ All 110 controls across 14 families
- ✓ Access control, audit & accountability, MFA
- ✓ Config mgmt, incident response, media protection
- ✓ System & comms protection, system & info integrity

DFARS 7012 Compliance

- ✓ DC3 / DIBNet incident reporting (72-hour)
- ✓ DFARS 7012 / 7019 / 7020 / 7021 clause coverage
- ✓ SPRS self-assessment submission & maintenance
- ✓ Subcontractor flowdown governance

Assessment Prep & Sherpa

- ✓ System Security Plan (SSP) authoring
- ✓ POA&M tracking & closure
- ✓ Evidence binder & artifact curation
- ✓ C3PAO pre-assessment dry runs

CMMC LEVELS AT A GLANCE

- 1 FOUND**
- Foundational — FCI Only** — 17 FAR 52.204-21 practices, annual self-assessment in SPRS. No CUI permitted.
- 2 ADV**
- Advanced — Required for CUI** — 110 NIST 800-171 practices, triennial C3PAO assessment. Most DoD contractors land here.
- Expert — Highest-Priority Programs** — NIST 800-172 enhanced practices, triennial government assessment. APT-focused.

MODULES INVOLVED IN CMMC

Module	Role in CMMC	Priority
Atlas	SSP & POA&M document management	Core
Govern	Policies mapped to 800-171 families	Core
Assess	Annual Level 1 self-assessment	Core
Audit	DFARS evidence & artifact trails	Core
Vault	Privileged credentials for CUI systems	Critical
Shield + Guardian	CUI endpoint & network protection	Critical
Signal	Audit logging per 800-171 AU family	Critical

WHY CMMC NOW

- Rule finalized:** CMMC 2.0 is in the DFARS; DoD enforcement ramping 2025-2026 at contract award
- Flowdown is real:** Primes are pushing DFARS 7012/7019/7020/7021 to every sub in the supply chain
- GCC High accessible:** Microsoft GCC High now viable for mid-market contractors handling CUI + ITAR
- DIBCAC accelerating:** Government assessments are increasing and SPRS scores are checked at award
- Contract-killer risk:** No CMMC = no renewal — compliance is now a revenue issue, not a cost issue

ENGAGEMENT MODELS

CUI Scoping & Gap Assessment — Fixed-scope, fixed-fee

Level 2 Implementation — 6-12 month fixed program

CMMC Managed Program — Monthly retained, always-ready

vCISO for Defense Industrial Base — Retained program leadership

DEFENSE INDUSTRIAL BASE SEGMENTS

- ✓ Prime DoD Contractors
- ✓ Sub-contractors
- ✓ Aerospace Manufacturing
- ✓ Precision Machining
- ✓ Defense Electronics
- ✓ Defense Software
- ✓ Research Labs
- ✓ Federally Funded Research

DOD-GRADE TOOL STACK

- Secrets:** N-able Passportal — privileged credential vault
- Assess:** Network Detective — NIST 800-171 assessment module
- PenTest:** Pentest-Tools.com — external vulnerability testing
- Insider:** Teramind — user activity monitoring for CUI
- Cloud:** Microsoft GCC High + Veeam DFARS-compliant backup

PROGRAM IMPACT

CMMC L2 Assessment ready	NIST 800-171 110/110 Controls live	SPRS Score +110 Target max
