Today

Win/Mac/Linux
+ Cloud + M365

Drift
Tracking

Audit
Reports

IT asset discovery and inventory — endpoints, servers, network, cloud, and identities reconciled into a single source of truth with drift detection.

DISCOVER CAPABILITIES

Asset Discovery

- ✓ Endpoints, servers, network devices & appliances
- ✓ Cloud accounts (Azure, AWS, GCP) & M365 tenants
- ✓ Identities, groups, service accounts
- ✓ Installed applications & SaaS surface

Inventory Normalization

- ✓ Deduplicate assets across multiple data sources
- ✓ Reconcile RMM, AD, cloud, and assessment data
- ✓ Tag & classify by business criticality
- ✓ Owner attribution & data sensitivity labels

Drift Detection

- ✓ Snapshot-to-snapshot diffs of inventory
- ✓ New, removed, and changed asset alerts
- ✓ Anomaly alerting on unexpected appearances
- ✓ Trend reporting on environment growth/churn

Reporting for Audits

- ✓ Asset inventory aligned to HIPAA, SOC 2, PCI
- ✓ CMMC asset categorization (CUI scope)
- ✓ Exportable evidence packs for auditors
- ✓ Quarterly & on-demand inventory snapshots

TODAY'S DELIVERY — COMMERCIAL TOOLS

TODAY — NETWORK DETECTIVE + RMM

Network Detective by RapidFire Tools (network, AD, cloud assessment) plus RMM extracts (ConnectWise, Ninja) and manual reconciliation. Point-in-time assessments delivered on a quarterly cadence.

TOMORROW — NEXUS DISCOVER

Continuous inventory, credentialed interrogation via JIT Vault leases, native cloud connectors, and automated drift tracking integrated with Atlas, Govern, and Audit.

WHY DISCOVER

- **Foundational Control:** Every framework requires "know what you own" — without inventory no other control works
- **Stop Audit-Time Surprises:** Continuous drift detection eliminates the pre-audit discovery scramble
- **Reconciled View:** One inventory across RMM, AD, cloud, M365 — no spreadsheet diffs
- **Scope Clarity:** CUI, PHI, and PCI scope boundaries explicit in the inventory
- **Nexus Migration Path:** Network Detective today, continuous Nexus Discover tomorrow

ENGAGEMENT MODELS

Model	Best For
Annual Asset Discovery	Quarterly Network Detective runs, fixed scope
Cloud Asset Discovery	Azure / AWS / M365 inventory & posture
Managed Inventory Program	Ongoing reconciliation & drift reporting
Bundled w/ My IT	Included in managed IT engagements

FRAMEWORKS SUPPORTED

- ✓ HIPAA
- ✓ SOC 2
- ✓ PCI-DSS
- ✓ CMMC
- ✓ NIST 800-171
- ✓ CIS Controls
- ✓ ISO 27001
- ✓ GDPR

DISCOVER IN ACTION

- 1 Scan:** Network Detective + RMM + cloud connectors collect raw data
- 2 Reconcile:** Dedupe, classify, attribute owners, tag criticality
- 3 Detect Drift:** Compare snapshots, alert on new/removed/changed
- 4 Report:** Framework-aligned inventory exports for auditors
