

Policy lifecycle from draft to retired — framework-aligned templates, approval workflows, exception management, and evidence linkage built for audit.

GOVERN CAPABILITIES

Policy Development

- ✓ Framework-aligned templates (HIPAA, SOC 2, CMMC...)
- ✓ Organization-specific customization & scoping
- ✓ Annual review cycles with reminders
- ✓ Plain-language summaries for end users

Approval Workflows

- ✓ Draft → Internal Review → Client Review → Approved
- ✓ Published → Archived states with full history
- ✓ Signed attestations & e-signature support
- ✓ Configurable approval chains per policy class

Exception Management

- ✓ Formal exception request & approval process
- ✓ Compensating control documentation
- ✓ Expiration tracking with renewal reminders
- ✓ Risk acceptance signoffs by accountable owners

Evidence Linkage

- ✓ Control mapping to framework controls
- ✓ Evidence binder generation for audit
- ✓ Cross-reference between policies, controls, evidence
- ✓ Audit prep packs aligned to specific frameworks

TODAY'S DELIVERY — CONSULTING

TODAY — TECHNIJIAN CONSULTING

Policies written manually from framework templates in Word; approvals via email; exceptions tracked in spreadsheets. Labor-intensive but deeply customized per client by experienced compliance leads.

TOMORROW — NEXUS GOVERN

Automated policy lifecycle, configurable approval chains, integrated exception workflows, and direct control-to-evidence mapping with continuous evidence collection.

WHY GOVERN

- **Policies Are Half the Audit:** Auditors test the policy, then test that you follow it — both must hold up
- **Lifecycle Is the Failure Point:** Written-once-and-ignored policies are worse than no policies
- **Exceptions Done Right:** Formal exception process with compensating controls keeps you defensible
- **Evidence Linkage:** Every control maps to a policy and to evidence — no audit-prep scramble
- **Nexus Migration Path:** Policies authored today flow into Nexus Govern automation tomorrow

ENGAGEMENT MODELS

Model	Best For
Policy Library Bootstrapping	Framework-specific full library build
Managed Policy Program	Ongoing updates + attestation cycles
Exception Audit	Review & remediate existing exceptions
vCCO (Virtual Compliance Officer)	Retained fractional compliance leadership

FRAMEWORKS SUPPORTED

- ✓ HIPAA ✓ SOC 2 ✓ PCI-DSS ✓ CMMC ✓ NIST CSF ✓ CIS Controls
- ✓ ISO 27001 ✓ GDPR

GOVERN IN ACTION

- 1 Author:** Framework templates → org-specific customization
- 2 Approve:** Internal → client review → published with attestations
- 3 Manage Exceptions:** Formal request, compensating control, expiration
- 4 Audit:** Control mapping & evidence binders ready on demand
