

Data Loss Prevention + User Activity Monitoring. Catch regulated data before it leaves the endpoint — and prove it for the auditor.

SHIELD CAPABILITIES

Endpoint DLP

Content inspection for PII, PHI, PCI, and CUI; behavior-based rules; warn / block / notify / record actions on USB, email, web upload, print, and clipboard.

User Activity Monitoring

Application + web activity, file events, clipboard, print events, policy-gated screen capture, and OCR-indexed search across captured content.

Insider Threat Detection

Anomaly detection per user, dynamic risk scoring, session playback with timeline, and exportable evidence packets for HR or legal review.

Compliance Evidence

Audit trails of regulated-data handling, DLP exception logs, insider incident reports — formatted for direct inclusion in compliance audit packs.

TODAY → NEXUS

TODAY — TECHNIJIAN DELIVERY

Teramind — enterprise DLP + UAM platform, deployed, tuned, and managed by Technijian. Mature, proven, ready today.

FUTURE — NEXUS PLATFORM

Nexus Shield module — native DLP + UAM integrated with Vault (credentials), Signal (SIEM), and Guardian (file protection) under one tenant.

WHY SHIELD

- **Endpoints Leak Data:** Regulated data (PHI, CUI, PII, PCI) walks out via USB, email, paste, and screen — Shield catches it.
- **Block, Don't Just Watch:** Real-time block/warn actions stop exfiltration before it completes — not just alerts after.
- **Insider Risk, Quantified:** Per-user risk scores let security teams focus on the few users that matter most.
- **Evidence for the Auditor:** Every DLP event, exception, and incident is logged in formats auditors accept directly.
- **Session Playback:** Investigations get definitive answers — see what the user actually did, not just metadata.

ENGAGEMENT MODELS

Model	Scope
Shield Deployment	Fixed-fee Teramind rollout: agent deployment, policy library, exception process, training
Managed DLP Program	Ongoing policy tuning, exception triage, monthly reporting, periodic policy review
Insider Threat Investigation	Per-incident response: timeline, evidence packet, HR/legal handoff, lessons learned
Compliance Reporting Package	Quarterly DLP audit reports formatted for HIPAA, PCI, SOC 2, CMMC assessor review

COMPLIANCE FRAMEWORKS SERVED

- ✓ HIPAA (PHI) ✓ PCI-DSS (CHD) ✓ CMMC (CUI) ✓ GDPR ✓ SOC 2 ✓ CCPA
- ✓ NIST 800-171
