Leases
(Future)

100%
Audit Trail

Zero
Plaintext
Exposure

Centralized credential and secrets management — rotation, least-privilege access, audit trails, and a clean migration path to Nexus Vault.

VAULT CAPABILITIES

Credential Management

- ✓ Password vault, API keys, tokens, certificates, TOTP seeds
- ✓ Per-tenant isolation — no cross-client exposure
- ✓ Structured documentation linked to credentials
- ✓ Browser, mobile, and ScreenConnect injection

Rotation & Lifecycle

- ✓ Scheduled and on-demand credential rotation
- ✓ Verification & rollback on rotation failure
- ✓ Failure workflows with automated re-try & alerts
- ✓ Aging & expiration tracking with renewal reminders

Access Control

- ✓ Role-based access with least-privilege defaults
- ✓ Just-in-time (JIT) leases for time-bound access
- ✓ Step-up authentication for privileged retrieval
- ✓ Approval workflows for sensitive credential checkout

Audit & Hygiene

- ✓ Privileged access logging — who, what, when
- ✓ Weak & reused password detection
- ✓ Credential aging & orphaned-account reports
- ✓ Framework-aligned audit exports (HIPAA, SOC 2, PCI)

TODAY'S DELIVERY — COMMERCIAL TOOL

TODAY — N-ABLE PASSPORTAL

Enterprise password and documentation vault used by Technijian to manage thousands of client credentials with rotation, browser injection, and structured documentation.

TOMORROW — NEXUS VAULT

JIT leases, browser/ScreenConnect/mobile injection, deep integration with Atlas, Discover, Govern, and every other Nexus module — one identity surface for compliance.

WHY VAULT

- **Foundation Control:** Every framework requires credential management — this is the first control auditors test
- **Stop Credential Sprawl:** Eliminate spreadsheets, sticky notes, and shared passwords across teams
- **Audit-Ready Always:** Privileged access logs and aging reports satisfy HIPAA, SOC 2, PCI, CMMC controls
- **Least-Privilege By Default:** Role-based with JIT leases means no standing admin access
- **Nexus Migration Path:** Start on Passportal today, migrate to Nexus Vault with no re-onboarding

ENGAGEMENT MODELS

Model	Best For
Vault Deployment Project	Passportal rollout, migration, onboarding
Managed Credential Program	Ongoing rotation, hygiene, audit reporting
Vault Audit & Hygiene	Point-in-time assessment of credential posture
Bundled w/ Managed IT	Fractional inclusion as part of My IT service

FRAMEWORKS SUPPORTED

- ✓ HIPAA
- ✓ SOC 2
- ✓ PCI-DSS
- ✓ CMMC
- ✓ NIST 800-171
- ✓ CIS Controls
- ✓ ISO 27001
- ✓ GDPR

VAULT IN ACTION

- 1 Onboard:** Migrate existing credentials, structure by tenant & role
- 2 Rotate:** Schedule rotation policies, verify success, alert on failure
- 3 Govern:** RBAC + JIT leases for least-privilege, step-up auth on sensitive
- 4 Audit:** Privileged access logs & hygiene reports for any framework
