MIGRATION READY

The Compliance Challenge

Most organizations treat compliance as an annual fire drill — a scramble of spreadsheets, emails, and screenshot evidence. Frameworks multiply, tools fragment, and the gap between written policy and operational reality widens every quarter.

Framework Sprawl

HIPAA, PCI, SOC 2, CMMC, GDPR, NIST CSF — overlapping but distinct requirements. Maintaining separate programs for each is duplicative, costly, and unsustainable.

→ One control set, mapped to every framework

Evidence Collection Chaos

Audit season arrives and teams scramble through tools, spreadsheets, and Slack threads to assemble evidence binders. Missing artifacts delay certifications and trigger findings.

→ Continuous evidence repository with audit packs

Policy Drift

Policies are written once, then ignored. Configurations diverge from documented controls. By audit time, the gap between paper and practice is wide — and auditors notice.

→ Policy lifecycle with recertification & attestations

Tool Fragmentation

Vault over here, documentation over there, SIEM somewhere else, DLP in a fourth place. No integrated view of compliance posture; no way to answer “are we covered?” on demand.

→ Integrated service suite, unified reporting

Why My Compliance Now?

- ▶ Ransomware-driven regulatory pressure is raising the bar: attestations alone are not enough — regulators want operational evidence
- ▶ Cyber insurance carriers now demand continuous monitoring evidence; point-in-time audits fail renewal questionnaires
- ▶ AI-enabled workflows make continuous compliance achievable — no more annual audit firefights or evidence scrambles
- ▶ Nexus migration path converts today's tool costs into tomorrow's integrated platform — with long-term cost reduction

Service Pillars

My Compliance is built on four pillars that let you start anywhere — single module, framework program, or managed suite — and scale into a continuously-monitored compliance operation.

Modular Service Architecture

Nine independently-purchasable modules, buy à la carte or as a full suite.

- ✓ Vault, Atlas, Discover, Govern, Assess
- ✓ Signal, Pulse, Shield, Guardian
- ✓ Independent pricing and scoping
- ✓ Bundled into framework programs as needed

Framework Programs

Delivery wrappers mapped to eight-plus major regulatory frameworks.

- ✓ HIPAA, SOC 2, PCI-DSS, CMMC / DFARS
- ✓ GDPR / CCPA, NIST CSF, ISO 27001
- ✓ CIS Controls (18 critical security controls)
- ✓ Readiness, gap, audit prep & certification

Today with Best-in-Class Tools

Proven commercial platforms combined with Technijian expertise — available now.

- ✓ N-able Passportal for credential management
- ✓ Network Detective by RapidFire Tools
- ✓ Pentest-Tools.com external assessments
- ✓ Teramind DLP & activity monitoring

Tomorrow on Nexus

Migration path to Technijian's unified multi-tenant compliance automation platform.

- ✓ AI-native workflows & continuous monitoring
- ✓ Integrated evidence & audit pack generation
- ✓ Lower total cost than stitched-together tools
- ✓ Priority migration for My Compliance clients

Best-in-Class Tools We Use Today

N-able Passportal

Credential & secrets management

Network Detective

Internal scans & AD audits

Pentest-Tools.com

External vuln & attack surface

Teramind

DLP & user activity monitoring

Module **Services**

Nine independently-purchasable compliance modules. Each available today via commercial tools plus Technijian expertise — each with a defined migration path to Nexus when the platform launches.

Vault **SECRETS**

Credentials, secrets, privileged access, password rotation, secure documentation, audit logging.

Today: N-able Passportal

Nexus: Nexus Vault w/ JIT leases

Atlas **DOCS**

Configurations, SOPs, runbooks, architecture diagrams, service relationships, knowledge base.

Today: Word, Confluence, Passportal Docs

Nexus: Nexus Atlas w/ AI Q&A

Discover **INVENTORY**

Endpoint, network, identity, cloud inventory with drift tracking and asset classification.

Today: RMM + Network Detective

Nexus: Nexus Discover continuous

Govern **POLICY**

Policy lifecycle, approvals, recertifications, exceptions, control-to-policy evidence linkage.

Today: Manual templates + email

Nexus: Nexus Govern automation

Assess **VULN**

Internal vuln scans, AD audits, external pentests, cloud posture, BCDR readiness reviews.

Today: Network Detective + Pentest-Tools

Nexus: Nexus Assess + Pulse

Signal **SIEM**

Log ingestion, detection engineering, UEBA, SOAR orchestration, incident case management.

Today: 3rd-party SIEM + manual triage

Nexus: Nexus Signal w/ AI triage

Pulse **ADVISORY**

Continuous advisory, automated control testing, posture scoring, and readiness reporting.

Today: Nexus Assess + Pulse (productized)

Nexus: Deeper automation + AI

Shield **DLP**

Endpoint DLP, user activity monitoring, insider threat detection, session recording, OCR search.

Today: Teramind

Nexus: Nexus Shield integrated DLP

Guardian **FILES**

Sensitive file discovery & classification, file integrity monitoring (FIM), ransomware response.

Today: Scripts + Teramind rules

Nexus: Nexus Guardian automated

Framework Programs

My Compliance wraps the module services into framework-specific delivery programs — readiness, gap analysis, remediation, audit prep, and ongoing maintenance mapped to the regulations and standards your organization must satisfy.

HIPAA
Healthcare
18 identifiers, BAAs

SOC 2
Tech & SaaS
Type I & II, TSCs

PCI-DSS
Payments
Card processing

CMMC
Defense / DFARS
CUI, Level 1/2/3

GDPR / CCPA
Privacy
EU & California

NIST CSF
General cyber
5 functions

CIS Controls
Cybersecurity
18 critical controls

ISO 27001
InfoSec Mgmt
ISMS certification

Typical Module Bundles by Framework

FRAMEWORK	TYPICALLY BUNDLED MODULES
HIPAA	Vault, Atlas, Govern, Assess, Shield, Guardian — ePHI protection, BAA evidence, access controls, audit logging
SOC 2	Atlas, Govern, Discover, Assess, Signal, Shield — TSC-mapped policies, continuous monitoring, evidence collection
PCI-DSS	Vault, Discover, Govern, Assess, Signal, Guardian — CHD scoping, quarterly scans, FIM, logging
CMMC	All nine modules — CUI protection demands the full stack including Shield DLP and Guardian FIM
GDPR / CCPA	Atlas, Govern, Discover, Shield, Guardian — data mapping, DPIAs, subject rights, breach response
NIST CSF	Atlas, Govern, Discover, Assess, Signal — Identify / Protect / Detect / Respond / Recover coverage
ISO 27001	Atlas, Govern, Discover, Assess, Signal, Shield — ISMS policies, risk register, Statement of Applicability

Supporting Services & Engagement

Modules and framework programs are reinforced by fractional compliance leadership, risk advisory, and continuous-monitoring services — delivered in whichever engagement model fits your organization.

vCCO / vCISO
Fractional compliance & security leadership. Monthly retained executive presence, board reporting, program ownership.

Risk Assessments
Annual organization-wide, vendor, and third-party risk reviews. Quantified risk registers with remediation roadmaps.

Audit Prep
Audit-sherpa guidance from readiness through certification. Auditor liaison, evidence packs, finding remediation.

Tabletop Exercises
IR and BCDR scenario drills. Ransomware, breach-notification, and continuity tabletops with executives and IT.

Security Awareness
Workforce training, phishing simulation, role-based awareness for HIPAA / PCI / CMMC-regulated staff.

Continuous Monitoring
Ongoing control testing, evidence freshness checks, posture scoring — no more annual-audit-only surprises.

Engagement Models

Fixed-Scope Projects
Framework readiness assessments, gap analysis, audit prep. Defined scope, deliverables, and outcomes. Best for discrete compliance initiatives.

Flexible Consulting
On-demand compliance expertise, policy updates, control testing, and ad-hoc advisory. Best for teams that need senior backup alongside internal staff.

Fractional vCCO / vCISO
Retained monthly compliance leadership. Ongoing program ownership, board reporting, auditor management, strategic roadmap.

Managed Compliance Program
Full-service ongoing compliance management with priority Nexus migration. Single accountable partner for the entire compliance operation.

Industries We Serve

Healthcare & HIPAA

Financial Svc & FINRA

Defense & CMMC

Legal & Professional

Technology & SaaS

Real Estate

Manufacturing

Retail & eCommerce

Ready to Operationalize Compliance?

Whether you need one module, a single-framework program, or a fully managed compliance operation — Technijian scopes, delivers, and manages it end-to-end.

About Technijian

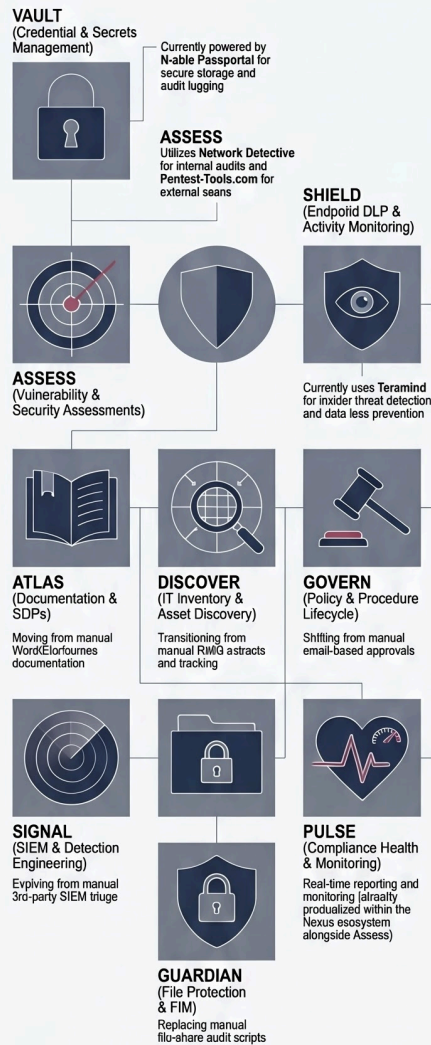

Technijian is a compliance services partner with 25+ years of IT operations experience. We deliver compliance programs today using N-able Passportal, Network Detective by RapidFire Tools, Pentest-Tools.com, Teramind, and Veeam — combined with deep framework expertise across HIPAA, SOC 2, PCI-DSS, CMMC, GDPR, NIST CSF, CIS Controls, and ISO 27001. Our flagship Nexus platform (launching soon) unifies all of these into an integrated multi-tenant compliance automation system. My Compliance clients receive priority migration to Nexus when it launches.

My Compliance Taxonomy

9 modules, 8+ frameworks, commercial tools today → Nexus automation tomorrow

Technician My Compliance: The Evolution of IT Compliance Taxonomy

CURRENT SERVICE MODULES & TOOLS (TODAY)

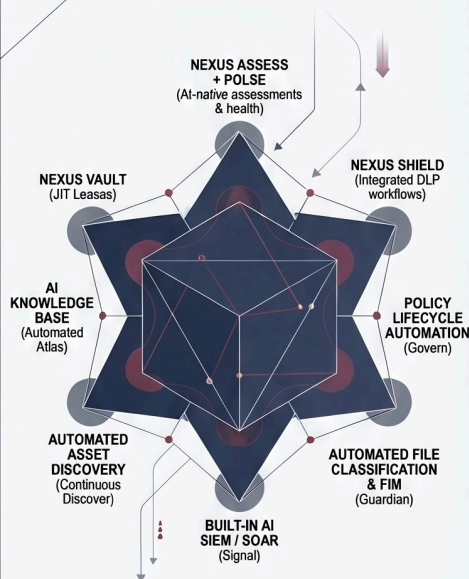

UNIFIED NEXUS PLATFORM (TOMORROW)

THE EVOLUTION: TODAY vs. TOMORROW

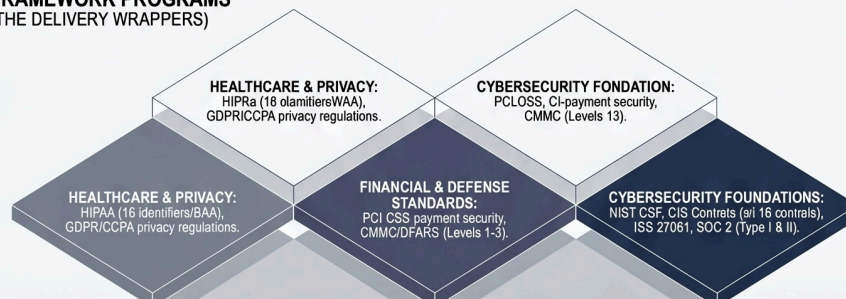

FROM DISPARATE TOOLS TO UNIFIED PLATFORM:
Today uses elite commercial tools;
Tomorrow unifies these into one AI-native Nexus interface.

FROM MANUAL CONSULTING TO AI AUTOMATION:
Current manual processes replaced by automated AI-native workflows.

THE NEXUS MIGRATION PATH:
Seamless migration to Nexus platform for lower costs and higher efficiency.

FRAMEWORK PROGRAMS (THE DELIVERY WRAPPERS)

Compliance, Operationalized.
