

CYBERSECURITY & 24/7 SOC SERVICES

My Security

Security That Operates 24/7 — threat prevention, detection, and response built for SMB and mid-market organizations. Layered defense backed by U.S.-based analysts.

AUDIT TRAIL

The Security Challenge

Attackers move faster than defenders. Most SMB and mid-market organizations have fragmented tools, no 24/7 coverage, and limited evidence for the next audit.

Ransomware & Extortion

Attackers encrypt your data and demand payment. Without layered defense and rapid response, you're paying or rebuilding from backups.

→ Layered EDR, backups & IR playbooks

Insider & Phishing Threats

Users click malicious links. Accounts get compromised. Without email security and user monitoring, one mistake cascades into a breach.

→ Email security + UEBA + awareness training

Compliance Audit Stress

HIPAA, PCI, SOC 2 auditors demand evidence. Without continuous monitoring and audit trails, you're scrambling to reconstruct a year of controls.

→ Continuous monitoring with evidence capture

Alert Fatigue & False Positives

SIEM tools generate endless noise. Your team drowns in low-value alerts while real threats slip by unnoticed in the volume.

→ Tuned SIEM triaged by U.S.-based analysts

Why My Security Now?

- ▶ Ransomware attacks have doubled year over year — SMBs are now the primary target, not an afterthought
- ▶ Cyber insurance carriers now require layered controls (MFA, EDR, SOC monitoring) for renewal at defensible rates
- ▶ Regulators across HIPAA, PCI, SOC 2, and CMMC increasingly expect continuous monitoring, not point-in-time checks
- ▶ AI-enabled attackers compress attack cycles from days to minutes — manual defense cannot keep up without 24/7 SOC

Security Service Pillars

A complete security program across prevention, detection, response, and governance — delivered as a managed service or as fixed-scope engagements.

Threat Prevention

- ✓ EDR / XDR on every endpoint and server
- ✓ Email security gateway with phishing defense
- ✓ Web filtering & DNS-layer protection
- ✓ Patch & vulnerability management
- ✓ MFA everywhere + conditional access
- ✓ Security awareness training & phishing simulation

24/7 Detection & SOC

- ✓ SIEM ingestion of logs, network & endpoint telemetry
- ✓ UEBA for anomalous user & entity behavior
- ✓ Proactive threat hunting & IOC sweeps
- ✓ MITRE ATT&CK tagging & case management
- ✓ Alert triage & escalation by U.S.-based analysts
- ✓ Monthly reporting & executive dashboards

Incident Response & Recovery

- ✓ 15-minute response SLA for critical incidents
- ✓ Containment playbooks & host isolation
- ✓ Forensics & root-cause investigation
- ✓ Tabletop exercises & IR plan development
- ✓ Breach notification & legal coordination support
- ✓ Post-incident hardening & lessons learned

Assessment & Governance

- ✓ Vulnerability scanning & risk prioritization
- ✓ External pentest via Nexus Assess + Pulse
- ✓ Active Directory & identity audit
- ✓ Risk assessments & control gap analysis
- ✓ Policy & procedure development
- ✓ Framework mapping (HIPAA, SOC 2, PCI, CMMC, NIST)

How We Engage

1

Assess

Scan, audit & prioritize risk

2

Architect

Layered controls & SOC design

3

Deploy

Stand up EDR, SIEM & playbooks

4

Operate

24/7 monitoring & continuous tuning

Security Use Cases

Representative industry profiles that map directly to the My Security service catalog — anonymized scenarios, not client case studies.

HEALTHCARE & HIPAA

PHI Protection Across Clinics & Endpoints

Multi-site provider needing HIPAA-aligned EDR, encrypted email, DLP for PHI, and audit trails across EHR-connected endpoints — delivered as a 24/7 managed SOC engagement.

HIPAA

Aligned

24/7

SOC

FINANCIAL SERVICES

Broker-Dealer / RIA 24/7 Monitoring

FINRA-regulated wealth manager requiring SIEM coverage of trading systems, WORM-compliant archiving, privileged access monitoring, and supervisory reviewable evidence packs.

WORM

Archiving

FINRA

Ready

MANUFACTURING

ITAR / CMMC Precision Shop

Precision manufacturer handling CUI — hardened identity, air-gapped options for sensitive networks, CMMC Level 2 control implementation, and quarterly evidence capture for primes.

CMMC L2

Controls

CUI

Enclave

INCIDENT RESPONSE

Post-Breach Recovery & Hardening

Organization hit by ransomware needing rapid containment, forensic investigation, safe recovery from backups, and 90-day hardening roadmap to prevent recurrence.

15-min

Response

90-day

Hardening

AUDIT READINESS

Pre-Audit SOC 2 / HIPAA Preparation

Growth-stage org preparing for first SOC 2 Type II or HIPAA audit — gap analysis, compensating controls, evidence collection automation, and auditor-facing documentation.

SOC 2

Ready

Evidence

Automated

Engagement Models

Flexible commercial structures spanning one-time assessments through fully managed 24/7 SOC operations.

Fixed-Scope Security Assessment

Defined scope, deliverable, timeline. Walk away with a prioritized action plan.

- ✓ Vulnerability & network security audits
- ✓ External & internal pentest (Nexus Assess + Pulse)
- ✓ Active Directory & identity audits
- ✓ Control gap analysis vs. HIPAA / SOC 2 / CMMC

Best for: Point-in-time validation or pre-audit prep

Flexible Consulting

On-demand security engineering and advisory support as your needs evolve.

- ✓ Architecture reviews & tool selection
- ✓ Policy & procedure development
- ✓ Incident response retainer hours
- ✓ Tabletop exercises & IR plan refresh

Best for: Internal security teams needing specialist depth

Managed SOC (Monthly)

Fully managed 24/7 detection, response, and hardening on a predictable per-endpoint subscription.

- ✓ EDR + SIEM + email security + MFA
- ✓ 24/7 U.S.-based analyst monitoring
- ✓ 15-minute critical response SLA
- ✓ Monthly reporting + quarterly business reviews

Best for: Orgs needing continuous coverage without

Fractional CISO

Retained monthly security leadership — program management, risk oversight, and board reporting.

- ✓ Security strategy & roadmap ownership
- ✓ Executive & board risk reporting
- ✓ Audit & regulator interface
- ✓ Vendor & insurance coordination

Best for: Growth-stage orgs not ready for a full-time

Industries We Secure

**Healthcare
& HIPAA**

**Financial Services
& FINRA**

& Education**

Best-in-Class **Security Stack**

We operate an opinionated stack of commercial tools — paired with Technijian expertise for tuning, triage, and incident response. No single product; the right product for the control.

● **Endpoint Detection (EDR / XDR)**

Microsoft Defender for Endpoint · CrowdStrike · SentinelOne

Behavioral detection on every endpoint and server, with isolation on confirmed compromise. Chosen per environment and licensing footprint.

● **SIEM & Threat Analytics**

Microsoft Sentinel · Splunk

Centralized log ingestion, correlation, UEBA, and MITRE ATT&CK-mapped detections — tuned to reduce false positives, not just collect data.

● **Email Security Gateway**

Proofpoint · Mimecast

Layered phishing, BEC, and malware defense on inbound and outbound email — the #1 attacker entry vector for SMB & mid-market.

● **Insider Risk & DLP**

Teramind

User activity monitoring and data loss prevention for regulated workloads — evidence for audits and signal for investigations.

● **Network & Security Audits**

Network Detective by RapidFire Tools

Automated network, security, and Active Directory audits that power our assessment and gap-analysis engagements end to end.

● **External Pentest**

Pentest-Tools.com · Nexus Assess + Pulse

Continuous external attack-surface testing plus on-demand pentest — packaged as the assessment-as-a-product companion to My Security.

Best-in-class tools + Technijian expertise

Tools alone don't stop attackers. We select, deploy, tune, triage, and continuously improve — so the stack actually works in your environment and holds up under audit.

Ready for 24/7 **Security Coverage?**

Schedule a security assessment or SOC consultation to map your current gaps, define layered controls, and stand up continuous monitoring with a 15-minute response SLA.

About Technijian

Technijian delivers modern, layered cybersecurity for Orange County and Southern California organizations — combining 25+ years of IT operating experience with a 24/7 U.S.-based SOC and deep compliance grounding across HIPAA, PCI, SOC 2, and CMMC. My Security pairs with Nexus Assess + Pulse for assessment-as-a-product engagements.
